**Subject:** Tucson Electric Power Rate Increase - Docket Number E-01933A-04-408

All,

I would like to share with you my concern about the proposed rate increase for Tucson Electric Power Company. I am a senior citizen who lives in Tucson, Arizona and I purchase my power from Tucson Electric Power.

I do not believe that it is fair that Tucson Electric Power be allowed to pass a 10% to 15 % rate increase on to the public. We had no input on what projects that Tucson Electric Power chose to invest in for their renewable energy projects and therefore we should not be held responsible for imprudent choices on their part. If Tucson Electric Power had let their public customers have input on the projects that they chose, we might we more inclined to support a rate increase, but they did not. We should not be held responsible for bad economic decisions on their part. Even though the economy appears to be better, most of us have not recovered from the exigencies of 2008 and money is tight with everyone. A 10% to 15% increase would be onerous on the general public. I am adamantly opposed to this rate increase.

Please do not let Tucson Electric Power get away with passing the bill on to the public for bad economic decisions on their part. Even though they were tasked with investing in renewable energy, they should have made a concerted effort to make those investments more economically viable.

Sincerely,

Sara L. Tomchin
