INSERT new finding of fact:

“21. The Commission believes that the UFI level should be set at \$0.10 per Watt (or whatever UFI level is approved for Tucson Electric Power Company) and that the budget should be reduced accordingly. In other words, the residential PV UFI rebate budget should be reduced to \$163,445 in light of the \$0.10 per Watt residential UFI and the total budget should be reduced to \$1,493,088.”
