Attachment I	Summary of Monthly Bill Impacts With and Without Energy Efficiency Enabling Provision Adjustments by Sector and Rate Schedule	

# **SOUTHWEST GAS CORPORATION**

---

## **I. INTRODUCTION**

---

Southwest Gas Corporation hereby submits its 2013 first quarter report on the performance of the Energy Efficiency Enabling Provision (EEP).

In its Opinion and Order in Docket No. G-01551A-10-0458, Decision No. 72723 (Decision), the Arizona Corporation Commission (Commission) authorized Southwest Gas Corporation (Southwest Gas or the Company) to implement the EEP, whereby Southwest Gas was granted authority to implement a monthly billing adjustment that adjusts customers' winter season bills when actual weather varies from the normalized weather used in the development of authorized rates. The EEP also tracks the non-weather differences in actual margin compared to authorized margin and includes a process to recover margin under-collections from and return margin over-collections to customers. The combination of these two components, generally referred to as revenue decoupling, results in the Company recovering the margin per customer authorized by the Commission, no more, no less.

During the first quarter, Southwest Gas' customers experienced weather that was significantly colder overall than the historical average. As a result, all customers, on average, received credit adjustments to their bills in each month of the reporting period.

In January, the coldest month of the first quarter, residential customer bills were approximately ten dollars (\$10.00) or 10.7 percent less on average than would have been experienced absent the monthly weather component of the EEP.

---

## **II. DISCUSSION**

---

This report is for the quarterly period January 1, 2013 through March 31, 2013. Bill analyses have been prepared by residential and non-residential sectors and by rate schedule. The rate schedules included in the residential sector are Single-Family Residential (Schedule No. G-5), Multi-Family Residential (Schedule No. G-6), Single-Family Low-Income Residential (Schedule No. G-10), and Multi-Family Low-Income Residential (Schedule No. G-11). The rate schedules included in the non-residential sector are Small General Service (Schedule No. G-25(S)), Medium General Service (Schedule No. G-25(M)), Large-1 General Service (Schedule No. G-25(L1)), and Large-2 General Service (Schedule No. G-25(L2)).

As described above, the EEP contains two components, a monthly weather bill adjustment and non-weather margin tracking. The non-weather margin tracking component compares authorized margin to actual margin and recovers or returns differences between authorized and actual margin in a rate adjustment. The non-weather tracking component will have no effect on customer bills until the Commission approves a rate adjustment as part of the annual review of the EEP. Therefore, this quarterly report only shows the effect of the monthly weather adjustment on customer bills during the first quarter of 2013.

Table 1 summarizes the first quarter bill impacts for the residential and non-residential sectors.

	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Residential Sector	\$69.88	\$74.79	(\$4.91)
Non-Residential Sector	\$549.74	\$569.51	(\$19.78)

Table 2 summarizes the quarterly results for each customer class included in the EEP.

	<u>W/EEP Adjustment</u>	<u>W/O EEP Adjustment</u>	<u>Difference</u>
Single Family Residential	\$72.15	\$77.25	(\$5.09)
Low Income Single Family	\$46.27	\$49.85	(\$3.58)
Multi Family Residential	\$39.35	\$41.05	(\$1.70)
Low Income Multi Family	\$31.15	\$32.98	(\$1.83)
Small General Service	\$103.55	\$110.98	(\$7.43)
Medium General Service	\$364.45	\$380.20	(\$15.75)
Large-1 General Service	\$1,577.82	\$1,623.87	(\$46.05)
Large-2 General Service	\$6,906.45	\$7,094.94	(\$188.49)

Attachment I contains schedules showing the development of the differences between average bills with the EEP adjustment and average bills without the EEP adjustment for residential/non-residential sectors and for each rate schedule for the months of January, February and March and by quarter.

---

### **III. SUMMARY**

---

As illustrated in the tables above, customers benefitted from the EEP and the monthly weather adjustment component – as, on average, all customers experienced lower monthly bills than they otherwise would have absent the Commission’s

implementation of decoupling. The EEP continues to perform as intended. The monthly weather adjustment helps to stabilize customer bills by reflecting normal weather conditions and by providing customers timely relief from colder than normal weather when their natural gas bills are the highest.

Southwest Gas will continue to closely monitor the performance of the EEP and looks forward to continuing to share this information with the Commission.
