I am resending this so it appears on the public record.

Sir, I believe, we the people of Arizona, should be using our resources here in Arizona to ensure we have the cheapest electric rates possible. The Federal Government should have no say so in our rates. The EPA and all other federal agencies have over stepped their legal limits in telling you and I what we should pay for our utilities.

Therefore, it is your duty to deliver this to the best of your ability. I know, as well as you know, there are a lot of people here that can not afford high rates that the federal government would have us pay.

Thank you sir.
