Subject: open letter

March 5, 2013

Green Valley, AZ 85614

This is an open letter to the ACC, so if this has been directed to the wrong department, please forward on to all who may be involved.

I read the article in the Daily Star this AM by Rep. Ron Barber about the ACC's plans to make changes in the state's renewable energy program. This is disturbing on many levels. We have the incredible opportunity to be an industry leader in the field of solar and wind energy. We will always have a growing need for energy as more and more people find the sun belt the place to relocate. (myself included!) What better way to promote our faith in the future than by supporting renewable energy?! I was quite proud of the vigorous requirement of 15% of our power coming from renewable resources by 2025. This should not include the solar panels installed at a home owners expense, private industry or any federally funded projects on military bases.

My analogy is to compare this to buying a toddler clothing that fits today and expecting them to fit a year later. Or 10 years later. A visionary looks to the future and makes decisions based on trends. We know our trend in Arizona is for continued growth. Why not put our faith and money behind that trend by producing renewable, clean energy.
