I am writing to STRONGLY protest your proposed changes to the state's renewable energy programs. Rolling back the 2007 mandate that required Tucson Electric Power Co. and Arizona Public Service Co. to produce 15 percent of their power from renewable sources by 2025 makes no sense. TEP's renewable source percentage would be dropped to 11.5 percent and APS' to 13.5 percent, a move in the wrong direction. PLEASE do not take this backward step.

Sincerely,
Paula Olch
Tucson

AZ Corporation Commission

March 15, 2013

Dear Commissioner Bitter-Smith-Web:

Please change back your recent decision to cut back on renewable energy sources. It is unacceptable and unsustainable to roll back the progress made toward renewable energy, and unwise given the current snail's pace of progress being made toward a more sustainable world for future generations. It is also important to consider the jobs created and sustained by the solar and wind energy industry – AZ keeps sliding back on the unemployment rolls – help to turn it around! As a person in the workplace, I know the value of a job and the structure it can create for good. So please keep up the jobs in AZ, and the cost-of-living ultimately.

Thank you for your attention.

Martie van der Voort, MC, CPC

Subject: Support solar incentives in AZ!

Categories: Responded

I am a business/home owner that just installed solar power. We need more incentives for solar installation not less. Arizona is a prime state for solar collection. I agree with Congressman Ron Barber and I think we need to do more to encourage more solar infrastructure.

Based on the commission's own actions businesses are instead not certain about investing in the sun's renewable energy, because the ACC is changing the rules in the middle of the game. Please be more supportive of solar financial incentives!

Thank you
