RE: Smart meters

Dear Mr. Stump,

Compelling scientific evidence demonstrates deleterious effects related to radiofrequency (RF) exposure, including cancer, neurological degeneration and nervous system dysfunction.

The World health Organization (WHO) has classified RF emissions as a group 2B carcinogen.

As a Board Certified radiologist, and long-standing member of the Phoenix medical community, I advise individuals with underlying malignancy, neurological disorders and chemical sensitivity to avoid RF exposure emitted by smart meters.

More than a dozen city and county governments have made smart meter installation illegal.

Susceptible individuals, indeed, all Arizonans have a right to refuse these meters without penalty.

All best,

Bob Kaplan, MD
