AZ CORP COMMISSION
DOCKET CONTROL

June 5, 2013

Subject: Please advance energy efficiency for TEP customers
Docket Number: E-01933A-12-0291

Dear Chairman Stump and members of the Arizona Corporation Commission,

I am writing as a TEP customer who wants you to increase energy efficiency, in order to meet Arizona's Energy Efficiency Standard, as part of the TEP rate case. I understand that energy efficiency might cost a bit more up front, which I'm willing to pay for, in order for electric bills to eventually go down.

Energy efficiency is a long lasting solution to our energy needs. In business terms, it's more like a capital investment than operational costs. It may cost more at first, but the payoff lasts for decades.

I do what I can in my home for energy efficiency. I have used CFLs for many years, and have replaced old appliance with energy efficient ones.

I thank you for your attention to this matter, and trust that you will do what is needed to benefit consumers and the environment over the long haul.

Sincerely,
Margaret Newman

Subject: Please advance energy efficiency for TEP customers
Docket Number: E-01933A-12-0291

Dear Chairman Stump and members of the Arizona Corporation Commission,

I am writing as a TEP customer who wants you to increase energy efficiency, in order to meet Arizona's Energy Efficiency Standard, as part of the TEP rate case. I understand that energy efficiency might cost a bit more up front, which I'm willing to pay for, in order for electric bills to eventually go down.

Personally, I have installed compact fluorescent bulbs throughout my home, and plan to install solar panels on my roof. I've also installed a high-efficiency toilet. I think homes and businesses throughout Arizona should do whatever they can to reduce energy use, and your Commission should encourage this by enforcing the Energy Efficiency Standards. Making it part of the rate schedule is a start.

Thank you for your consideration.

Sincerely,
Shirley Muney

Dear Chairman Stump and members of the Arizona Corporation Commission,

I am writing as a TEP customer who wants you to increase energy efficiency, in order to meet Arizona's Energy Efficiency Standard, as part of the TEP rate case. I understand that energy efficiency might cost a bit more up front, which I'm willing to pay for, in order for electric bills to eventually go down.

Energy efficiency is important for saving the planet's resources. We don't live alone in this State, in this wonderful country, in this marvelous world. Please consider your children and your children's children and the legacy we're leaving for them.

When I've done my part, such as installing energy-efficient light bulbs, unplugging appliances and lights when not in use and utilized TEP energy efficient rebates, I appeal to you as trustees of the Commission to ensure energy safe measures..

Thank you for your attention to this issue.

Sincerely,
Valerina Quintana

Subject: Please advance energy efficiency for TEP customers
Docket Number: E-01933A-12-0291

Dear members of the Arizona Corporation Commission,

As a customer of Tucson Electric Power, I am writing to express my support for energy efficiency as part of the TEP rate case. I am concerned about the health costs that accompany the burning of coal and the use of relatively inefficient processes to provide energy to Tucson. I am in support of energy efficiency as it reduces operation costs and lowers the cost of maintenance.

Because of this, I would agree to pay slightly higher utility rates for energy efficiency so that the cost of providing electricity can decrease over time.

Thank you for your consideration.

Sincerely,
Eve Shapiro

Docket Number: E-01933A-12-0291

Dear Chairman Stump and members of the Arizona Corporation Commission,

I am writing as a TEP customer who wants you to increase energy efficiency, in order to meet Arizona's Energy Efficiency Standard, as part of the TEP rate case. I understand that energy efficiency might cost a bit more up front, which I'm willing to pay for, in order for electric bills to eventually go down.

Energy efficiency is important to me because it is the lowest cost resource, reduces air pollution from coal-fired power plants, reduces asthma and other respiratory illnesses.

Oil and coal would are not competitive source of energy and their price is low only because the huge subsidies from the federal government. Not counting these subsidies, alternative energy is cheaper.

Thank you for your attention to this issue.

Sincerely,

Docket Number: E-01933A-12-0291

Dear Chairman Stump and members of the Arizona Corporation Commission,

I am writing as a TEP customer who wants you to increase energy efficiency, in order to meet Arizona's Energy Efficiency Standard, as part of the TEP rate case. I understand that energy efficiency might cost a bit more up front, which I'm willing to pay for, in order for electric bills to eventually go down.

I strive for energy efficiency- my home has an energy-star rating- it's super-insulated & passively solar. My AC thermostat is set to 80 degrees, light bulbs are energy-efficient, I carpool, ride the bus or walk, use cloth bags to shop & am gradually replacing appliances with the newest, most efficient models.

I feel I am doing my part to reduce air pollution from coal-fired power plants, reduce asthma and other respiratory illnesses. Won't you help to ensure energy efficiency for all TEP customers?

THANK YOU, Chairman Stump & members of the commission for your prompt attention to this consequential issue! I vote & I care!!

Sincerely,
Jeryl Ogden
