Article by Diane Wilkens
Scientific consensus-Smart meters harm

RECEIVED

The following is from an article by Diane Wilkens:

2013 JUN 10 A 11:02

"While research groups funded by the wireless industry claimed they could not replicate Commission results of non-industry studies, these non-industry studies have proven that serious adverse health effects result from RF radiation exposure to wireless devices such as smart-meters".

COMMUNICATIONS COMMISSION
UNCONTROLLED
JUN 10 2013

"In 2012 the distinguished American Academy of Environmental Medicine issued a position paper opposing the installation of wireless 'smart-meters' based on scientific assessment of the current medical literature and states that 'chronic exposure to wireless radio frequency radiation is a preventable environmental hazard that is sufficiently well-documented to warrant immediate preventative public health action.'"

RECEIVED BY
JSM

In 2012 the ENVIRONMENT AND HUMAN HEALTH GROUP issued a warning concerning RF radiation and its affect upon pregnant women as well as dangers of metabolic effects.

The following doctors are on the Board of Directors of the The Environment and Human Health Group and can be contacted to verify their findings concerning the negative effects of smart-meters upon human beings:

- Dr. Robert G. La Camera, MD
- Dr. Hugh S. Taylor, MD
- Dr. David R. Brown, ScD
- MARK CULLEN, MD, PROFESSOR OF MEDICINE AND PUBLIC HEALTH, YALE UNIVERSITY SCHOOL OF MEDICINE.
