INSERT new findings of fact:

105. We support energy efficiency but we think the process could and should be improved. We are not convinced that the current method of cost-effective analysis is the best way to ensure that ratepayer money is being invested in a prudent manner. We think there should be further discussion, outside of this implementation plan, to more fully explore the various options that could better analyze cost efficiency. We look forward to the opportunity to make sure that energy efficiency programs are truly cost effective.

106. As stated earlier, Staff's analysis estimates that SSVEC will only reach 0.578% of prior year retail energy sales, by the end of 2014, if all proposed programs are approved, even though the Energy efficiency standard calls for 5.44%. In fact, SSVEC has not been able to achieve the EE Standard targets, each year, which led Staff to propose a waiver from the EEES Standards. Even the most ambitious implementation plans cannot reach the EE Standards. We feel that this is one of many reasons why the entire EE process needs to be reviewed and possibly reformed.

107. Accordingly, we decline to approve any programs beyond 2013 so that SSVEC need not spend money nor prepare for any 2014 programs while we review and possibly revise the EE process.

108. We approve a \$200,000 budget for the Energy Efficient Improvement Loan Program, for 2013. We approve a \$50,000 budget for the Residential Energy Management Program but decline to approve the Meter Miser Guide measure. We decline to approve the Refrigerator Recycling Program. We decline to approve the Low Income Weatherization Program. We approve a \$4,500 budget for The C&I Energy Management Energy Audits, for 2013. We decline to approve the Commercial and Industrial Lighting Incentive Program. We approve a \$25,000 budget, in 2013, for the Water Heater Rebate Program. We approve a \$20,000 budget for the Heat Pump Program.
