AZ CORP COMMISSION  
DOCKET CONTROL

Dear Chairman Stump and Commissioners,

The Recreation Centers of Sun City, Inc. (RCSC) would like to express our concerns over the recent discussions regarding changing the policies surrounding net metering. RCSC has fourteen solar projects that will be completed and online in the very near future and many of our residents in Sun City have invested in rooftop solar, because of the net metering policies that the Commission adopted. Net metering allows RCSC and our residents the choice of solar, while also providing those on a fixed income the ability to manage their energy costs and needs.

We appreciate the Commissioners desire to hold a procedural conference to determine the best way to move forward. We have heard over and over again that APS' decision to bring this matter forward is to protect rates and ratepayers. If this is truly the case, we feel that any discussion or change to this policy should happen during the proceedings of a rate case. This would allow the Commission to look at this monumental change in policy holistically with the cost of service and all the other social and economic policies to determine the best rate design.

We look forward to attending the procedural conference, and appreciate the opportunity to be a voice in this discussion.

Sincerely,

Jan M. Ek, CMCA, AMS, PCAM  
General Manager
