Dear Commissioners,

Given the Arizona Corporation Commission's effort to understand and consider the guidelines surrounding the use of digital (smart) meter technology (AZCC docket #00000C-11-02328), I doubt the "public" utilities' have been forthcoming about the true extent of their knowledge surrounding this type of meters veiled, secretive use as a surveillance tool.

We are quite certain SERIOUS PRIVACY VIOLATIONS HAVE, AND ARE OCCURRING, and though we are unable to offer anything (aside from this note to the Commission) more detailed for legal reasons, we want the Arizona Corporation Commission to be made aware of this fact:

"This Arizonan, and our entire family, have serious PRIVACY and HEALTH concerns surrounding the use of digital meters, especially like the one TEP suddenly, without prior notice, discussion or authorization installed on my / our home May 9, 2012.

Sincerely,

A. Peter and Liisa H. Lorenzen
