W-02068A-11-0471 Decision# 73778

June 17, 2013

To: Arizona Corporation Commission

Proposed meter replacement program:

Eden Water Company looked at the dates meters were installed and the amount of water used from those meters (see table below). EWC looked at the year installed and the usage rate and prioritized meter replacement. Eden Water Company proposes to replace the meters at a rate of 10 meters per year, with addition to replacing meters that work is done at the meter sight that has high use or has been in over ten years. This would bring the total replacements to 15 to twenty per year.

Purchase of the billing software:

The Eden water company does not have the income to purchase the software at this time. The water company is doing this by hand with spreadsheets. The Company will purchase the software when it has enough cash on hand to do so. The Company will notify the Commission when it completes the task.

If I can answer any questions please do so.
