NOTICE OF NO CONSENT TO TRESPASS AND SURVEILLANCE, NOTICE OF LIABILITY

Dear ARIZONA PUBLIC SERVICE and all agents, officers, employees, contractors and interested parties,

If you intend to install a "Smart Meter" or any activity monitoring device at the above address, you and all other parties are hereby denied consent for installation and use of all such devices on the above property. Installation and use of any activity monitoring device is hereby refused and prohibited. Informed consent is legally required for installation of any surveillance device and any device that will collect and transmit private and personal data to undisclosed and unauthorized parties for undisclosed and unauthorized purposes. Authorization for sharing of personal and private information may only be given by the originator and subject of that information. That authorization is hereby denied and refused with regard to the above property and all its occupants. "Smart Meters" violate the law and cause endangerment to residents by the following factors:

1. They individually identify electrical devices inside the home and record when they are operated causing invasion of privacy.
2. They monitor household activity and occupancy in violation of rights and domestic security.
3. They transmit wireless signals which may be intercepted by unauthorized and unknown parties. Those signals can be used to monitor behavior and occupancy and they can be used by criminals to aid criminal activity against the occupants.
4. Data about occupant's daily habits and activities are collected, recorded and stored in permanent databases which are accessed by parties not authorized or invited to know and share that private data by those who's activities were recorded.
5. Those with access to the smart meter databases can review a permanent history of household activities complete with calendar and time-of-day metrics to gain a highly invasive and detailed view of the lives of the occupants.
6. Those databases may be shared with, or fall into the hands of criminals, blackmailers, corrupt law enforcement, private hackers of wireless transmissions, power company employees, and other unidentified parties who may act against the interests of the occupants under metered surveillance.
7. "Smart Meters" are, by definition, surveillance devices which violate Federal and State wiretapping laws by recording and storing databases of private and personal activities and behaviors without the consent or knowledge of those people who are monitored.
8. It is possible for example, with analysis of certain "Smart Meter" data, for

unauthorized and distant parties to determine medical conditions, sexual activities, physical locations of persons within the home, vacancy patterns and personal information and habits of the occupants.

9. Your company has not adequately disclosed the particular recording and transmission capabilities of the smart meter, or the extent of the data that will be recorded, stored and shared, or the purposes to which the data will and will not be put.

10. Electromagnetic and Radio Frequency energy contamination from smart meters exceeds allowable safe and healthful limits for domestic environments as determined by the EPA and other scientific programs.

I forbid, refuse and deny consent of any installation and use of any monitoring, eavesdropping, and surveillance devices on my property, my place of residence and my place of occupancy. That applies to and includes "Smart Meters" and activity monitoring devices of any and all kinds. Any attempt to install any such device directed at me, other occupants, my property or residence will constitute trespass, stalking, wiretapping and unlawful surveillance and endangerment of health and safety, all prohibited and punishable by law through criminal and civil complaints. All persons, government agencies and private organizations responsible for installing or operating monitoring devices directed at or recording my activities, which I have not specifically authorized in writing, will be fully liable for any violations, intrusions, harm or negative consequences caused or made possible by those devices whether those negative consequences are justified by "law" or not..

This is legal notice. After this delivery the liabilities listed above may not be denied or avoided by parties named and implied in this notice. Civil Servant immunities and protections do not apply to the installation of smart meters due to the criminal violations they represent.

Notice to principal is notice to agent and notice to agent is notice to principal. All rights reserved.

RE: [REDACTED]

APS Service Address: [REDACTED]
AZCC Docket No. E-00000011-0328

Dear Mr. Brandt:

This is to serve as legal notice and follow up to my email that was sent on 5/24/13 and acknowledged by APS on 5/28/13 that I refuse to allow a smart meter to be installed on my property (copy attached).

This is a Notice of No Consent to Trespass & Surveillance, Notice of Liability to APS and all agents, officers, employees, contractors and interested parties. Do not install a smart meter at 100 Solo De Paso Lane, Sedona, AZ.

After studying the research of Smart Meters, I have come to the conclusion they are unsafe and highly dangerous.

I reject this for the following reasons:

1. Health hazard
2. Fire hazard
3. Invasion of privacy
4. An excuse to increase my electric bill.

This is legal notice. I will not permit a smart meter on my property.

Sincerely,

Mary Morris

RE: APS SMART METER OPT OUT
AZCC Docket No. E-00000-~~11~~-0328
2

TO: Arizona Corporation Commissioners
Susan Bitter Smith
Brenda Burns
Robert Burns
Gary Pierce
✓ Bob Stump

CC: AZ Governor Jan Brewer
AZ Attorney General Tom Horne

Commissioners - It has come to my attention you will be reviewing fees to access APS customers who wish to opt out of the planned Smart or Digital Meters installation. I am strongly opposed to smart meters and any fees to refuse them. APS currently charges a fee to read our meter and to access a higher fee for a service not provided is senseless.

After studying the research of Smart Meters, I have come to the conclusion they are unsafe and highly dangerous. I urge to recognize this legitimate issue.

I reject Smart Meter installation for the following reasons:

1. Health hazard
2. Fire hazard
3. Invasion of privacy
4. An excuse to increase my electric bill.

I will not permit a smart meter on my property.

I have sent written notification to APS that I am opting out of any smart meter on my property and urge you all to **provide a simple - non-punitive, no-cost option for all customers who elect to opt out of this metering.**

Sincerely,

Mary Morris

RE: Generic Docket for Commission's Inquiry into Smart Meters
Docket No: E-00000C-11-0328

Dear Sirs;

This letter I am sending you will show all bad health problems with "Smart Meters"
I also believe these Smart Meters are almost like back in 2004 when APS was working on
BTL internet on the Power Lines that would have destroyed HAM RADIO and Short
Wave Radio. There is no way of knowing on what Smart Meters would cause to Ham
Radio if implemented. GOD BLESS AMERICA Sincerely KB7KMR

My husband and I own the home at [REDACTED], Payson AZ 85541

Our APS [REDACTED]

We had our just turned 13 year old grandson, an almost 6 year old granddaughter and our adult daughter move in with us last November. Nick had seizure disorder when he was little and has only been off seizure medication for the past three years. He has learning disabilities due to his long time on the seizure meds. He is sleeping in the bedroom that has our analog electric meter just outside the wall at the head of the bed. We can make no other sleeping arrangements for him. We do not want a Smart Meter with its electromagnetic pulse transmissions messing with his brain as he sleeps at night. We have learned a lot about wireless transmissions and we are fearful of the effects it might have not only on him, but the rest of us.

THEREFORE, WE ASK THAT YOU ALLOW US TO KEEP OUR SAFE ANALOG METER... AND WE DO NOT GIVE YOU PERMISSION TO INSTALL A SMART METER ON OUR HOME.

We understand that we can read our own meter and we will be happy to do that. We do not want to be penalized a fee for having a meter reader come to our home. And we should not be penalized by the exorbitant punitive opt out fee that we hear you, APS, has requested and is being considered by the Corporate Commission.

So, Do not remove our Analog meter and replace it with a digital smart meter.

Subject: RE: smart meters

Hello,

Here is a short video clip trailer for a coming film about smart meters and their effects on people's homes (explosions!) and health (downturns in condition, and deaths, among people already ill; and loss of health among other previously healthy people). Also, it presents figures indicating a smart grid may lead to dramatic increases in electricity costs, rather than decreases.

Film Trailer

I am glad I don't have the responsibility you have in making a decision about allowing a smart grid to be built in Arizona. Or should I say it would be easy for me to decide to vote against it!

Thanks for your attention to this important issue,
Jeff Heidt
Sedona, AZ
