Barry Goldwater's business, as well as all the other TUSK member businesses, should be extinguished since their business model requires subsidies to be profitable.

These businesses are not about free market principles or free choice. They are subsidy hogs plain and simple. Goldwater and the other TUSK members are bastardizing the principles of the Tea Party and people are falling for the smoke and mirrors.

As a ratepayer, I encourage ACC to support and APS to fully implement a net metering program that does not discriminate against customers without rooftop solar panels. That Goldwater and TUSK wholeheartedly support this discrimination should be disgusting to all.

All utility customers use all of a utility's infrastructure. Everyone should pay the same rate.

I am also thoroughly disgusted with Gov. Brewer's push for solar energy on the public lands. But that's another battle....

Sincerely,

Diane Miller
