Subject: net metering--protect

Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering.

Net metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other ratepayers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

I urge you to protect net metering.

Subject: Solar Energy and Net Metering

Dear Susan,

I am an Arizona voter (yes, I did vote for you), APS customer and have home roof top solar panels. I installed solar panels 4 years ago on the basis of combined reduced energy costs, carbon emissions and lessening the need for infrastructure expansion in the future.

The so called "free ride" for infrastructure and distribution costs given to net-metering customers is in fact more than offset by the benefits of solar power. I urge you to read, and I suspect that you have not already, the article Herman K. Trabish, The True Value of Arizona Solar, By the Numbers :

<http://www.greentechmedia.com/articles/read/The-True-Value-of-Arizona-Solar-By-the-Numbers>

This article delineates the net benefits which APS will accrue with the current net metering program. I made an investment based on receiving a fair credit for the valuable clean power delivered to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go sola.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments.

I am 73 years old, retired with a fixed income and the current solar tariff rates are key in containing future increases in energy costs.

I strongly urge you to protect net metering. Look at the increase in ASP's profits over the past recessionary period, do they really need to demand more revenue for the small customer such as myself?

Yours sincerely

Subject: Protect Net Metering and Jobs

Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering. I also currently supply my house with 100% solar power.

Net metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry. Not to mention the importance of promoting clean energy for our planet's health.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments. If we are providing energy to the grid, that energy has value and it's only fair for those providing it to get some credit for it.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other ratepayers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

Please protect net metering.

Sincerely,
Cristina Williams

Dear Corporation Commissioners,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering.

Net metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments and will serve as a deterrent to future solar projects.

Home and business owners spend their own money to install systems that provide many stabilizing benefits to the grid and other ratepayers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

This move would be extremely short sighted. I urge you to protect net metering, renewable energy and a natural growth industry for Arizona. As the leader in sunshine, Arizona cannot lag behind on solar. We must embrace it. Even if utility costs go up some. We already have low energy costs by comparison of other states.

Dear Corporation Commissioner:

I am an Arizona voter and utility customer and am writing to urge you to protect net-metering. Net-metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses and schools and public agencies to go solar, and to drive the growth of a successful Arizona industry.

Utilities in the state want Arizona to change its successful net metering program and I am very concerned that this could result in not properly compensating customers for their valuable and expensive energy investments.

I've spent a significant sum of money to install a solar system which benefits not only me but the grid and other consumers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it. In the few short months since I've gone solar my energy use has significantly decreased as have my energy costs. I'm encouraging all my friends/family to go solar, not only to generate cost savings but to protect our environment.

I urge the Commissioners to protect net metering. Thank you for your time.

Further more this program has been essential in keeping our utility cost down and allowing our family to stay in our home. We need to use more clean energy and help us to shed the yolk of fossil fuel use. We need an energy independent America and solar power in the Southwest is an important tool in achieving this goal.

Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering.

I lived in Germany about 12 years ago when solar and wind power was starting to take off. Germany is now a world-leader in these industries. However, solar and wind power need some government support to succeed - that is true in Germany and in our great state of Arizona. Only with a vision and determination was Germany able to achieve what it has today. Our sunny state of Arizona has even more natural resources - specifically relating to solar power. We can become the world-leader in this type of industry but only if YOU have the vision to make it happen.

Net metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other ratepayers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

I urge you to protect net metering.

Subject: Protect Net Metering in Arizona

Dear Commissioner:

I am an Arizona utility customer, and I am writing to urge you to protect net metering.

Net metering is the policy that makes sure solar customers get fair credit for the valuable clean power they deliver to the grid for others to use. Utilities are using fuzzy math to make the case that Arizona should change its successful net metering policy. I am highly concerned that the utilities are threatening to stop properly compensating net metered customers for their valuable energy investment.

When Arizona homes and businesses go solar, all utility customers benefit. In fact, a recent study found that because of net metering, APS customers alone will receive \$34 million in grid benefits each year starting in 2015. These benefits include saving on expensive conventional power generation and grid infrastructure as well as reducing electricity lost during long-distance transportation over power lines. Rooftop solar power also delivers tremendous economic, energy independence and public health benefits to our state.

Arizona voters know that more rooftop solar power is the right direction for our state. Poll after poll shows that, regardless of political orientation, a supermajority of Arizonans support continued solar development.

I urge you to be a solar energy champion by protecting net metering.

Subject: PLEASE PROTECT NET-METERING

Dear Corporation Commissioner's of Arizona,

I am an Arizona resident, voter and utility customer (APS) and I am writing to **urge you to protect net-metering.**

Net metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry. I took the leap of faith two years ago and selected Solar City to install 48 solar panels on my roof. I live in an Adult Community, I am 70 years old, retired from Law Enforcement and live on a fixed income. I was lucky to get in on the ground floor when the solar project became available to me. Many of my senior citizens friends have been saving what little they make in Retirement to be able to afford to purchase/lease their own panels. But if this rate hike is allowed to go through they will not be able to take advantage of the benefits that Solar offers to us and everybody else here in the valley that want to go Solar and give back to the grid for other's to be able to use the power. I did a lot of comparative shopping and totally considered the expense and return of going Solar. My choice was a good one and I am happy with my decision. However, if the Utilities get this cost increase passed it will kill the Solar industry here or anywhere in our great State.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other rate-payers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

I urge you to protect net metering!!!

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other ratepayers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

I don't know what is happening to our great country. People are so greedy and don't think about what is the best for the whole. The solar is out there for anyone who wants it. It is a shame for it not to be used for the best interests of the people.

I urge you to protect net metering.

Sincerely,
Richard and Karen Myers

Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering.

Net metering ensures that solar customers like me receive fair credit for the valuable clean power we deliver to the grid for others to use during the day. It is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customers for their valuable energy investments.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other ratepayers. Net-metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

I urge you to act responsibly and protect net metering.

Sara and Jim Mayfield

Dear Corporation Commissioner,

**I am a homeowner in Prescott Valley.
7820 E Hunters Hideaway
Prescott Valley, AZ 86315**

**I am a solar energy consumer as of December 2012.
I love that I am generating power at home for my community and minimizing my costs.
I have installed a system larger than my minimal needs because I am thinking of my future usage and
I believed APS would always be buying the extra power from me thus defraying the installation cost.
I object to APS asking to discontinue the net metering program.**

Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering.

Subject: Protect Net Metering and Jobs,

Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to URGE you to protect net-metering.

Net metering ensures that solar customers like me receive "fair" credit for the valuable clean power we deliver to the grid for others to use during the day.

The utility has to PAY to generate power from other sources, WHY take away my net metering? Net Metering is one of the most important policy tools the Commission has for empowering homes, businesses, schools and public agencies to go solar, and to drive the growth of a successful Arizona industry.

Utilities in the state want Arizona to change its successful net metering program and I am highly concerned that this could result in not properly compensating customer for their valuable energy investments.

Home and business owners spend their own money to install systems that provide many benefits to the grid and other ratepayers. Net Metering also allows utility customers to make their own choices about where they get their electricity, what type of electricity they want and how much they're willing to pay for it.

I urge you to protect Net Metering - I urge you to protect the Solar industry as one of Arizona's most promising. I urge you to keep the utilities in line - again, they MUST purchase power from somewhere and/or to produce it. Keep Net Metering.

A concerned registered Arizona Voter,

Michael Horst

Even though the following is a form letter, I agree strongly with it's contents. As retired people, we live on a fixed income. We invested in a roof top solar system with the encouragement of APS thorough their advertising and their financial incentive. It will take a number of years to pay us back for that investment through our lower power bills while at the same time we are putting power back onto the grid. Net Metering has allowed us to build a reserve during the winter, spring and fall which is offsetting the energy costs during associated with the summer summer months. Roof top solar systems provide jobs and should be encouraged. Our systems have no impact on the environment as they are added to existing structures. If anything, the corporation commission should take the lead and encourage APS and SRP to do more to encourage homeowners, businesses, schools, etc. to add solar systems to their structures.

Dear Corporation Commissioner,

I am an Arizona voter and utility customer and I am writing to urge you to protect net-metering.
