- C. The rates and regulations contained in this Tariff apply only to the intrastate telecommunications Services furnished by Company and do not apply, unless otherwise specified, to the lines, facilities, or the Services provided by a Local Exchange Carrier or other common Carrier for use in accessing the Services of Company. TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the Page. Pages are numbered sequentially. However, new Pages are occasionally added to the Tariff. When a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the Commission. Because of various suspension periods, deferrals, etc., the most current Page number on file with the Commission is not always the Tariff Page in effect. Consult the Check Page for the Page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Pages** - When a Tariff filing is made with the Commission, an updated Check Page accompanies the Tariff filing. The Check Page lists the Pages contained in the Tariff, with a cross-reference to the current revision number. When new Pages are added, the Check Page is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some Pages.) The Tariff User should refer to the latest Check Page to find out if a particular Page is the most current on file with the Commission.
