Dear Commissioners Gary Pierce, Brenda Burns, Bob Stump, Susan Bitter-Smith and Bob Burns,

I read, with great interest, the mailings and bill inserts describing the filing for a rate decrease from the major wholesale provider of MEC. We are following this proposed decrease very closely, as it is rare for the ACC to be provided a chance to actually lower rates, and rare for the end users to see a favorable cost reduction that will affect our bills.

I also am aware that out-of-state consultants hired by the ACC are trying to block the rate decrease on speculative data and guesses of what may happen to the costs in the future. We ask that you do not let these consultants prevail with their speculation of what the future costs may or may not be, and allow the rate decrease. If future EPA edits or other rulings do force the wholesale rates to go up, I would look to the wholesale provider to demonstrate the need, with certainty of numbers at that time and you will have a chance to see those and act with certainty.

Sincerely,

Emma Jean Watson

Subject: AEPCO rate decrease

Dear Mr Stump,

I recently read about the proposed rate decrease for Arizona Electric Power Coop and the fact that the ACC is attempting to block the change based on speculative data about future pricing. The people of Arizona need every break in their energy bills that they can get. Please don't allow outside consultants make the decision for our residents. Approve the rate decrease.

Sincerely,

Ellen Brown

Subject: Electric Rates in Bullhead City, AZ

It has recently come to my attention that Mohave Electric Cooperative requested to reduce the rate it charges its customers in Bullhead City. This request was subsequently denied by the Arizona Corporation Commission.

In our present economy and the fact that Bullhead City could be called a "depressed" area, the request presented to you for a rate reduction is incomprehensible. We are a retired couple and although our income is enough to meet our everyday needs, we find it more difficult each and every date when prices on just about everything keep rising and our income remains unchanged. We keep our air conditioning set at a warm 80 degrees during the summer months when the temps are 100 or higher, laundry is done once per week of 2 – 3 loads, and other than the TV and computer, very little electricity is consumed.

Do what is right and that is to approve a rate reduction for the Arizona residents residing in Bullhead City, AZ to Mohave Electric Cooperative. Thank you!

Subject: MEC Rates Decrease request

It is our understanding that Mohave Electric Cooperative is currently trying to push for a decrease of rates but its getting opposition from consultants of Arizona Corporation Commission against it.

Last month our household electric bill was \$220.00 and I expect it to be closer to \$300.00 this month for a one income household of a family of four (4). While it may not be much to some, it an incredibly high expense for us who live paycheck to paycheck. In addition, this poses many hardships and we have had to rely on local food drives in order to have enough food to eat. Please consider the continued impact upon our community with continued rates vs. the help and relieve towards families and individuals that practically live in poverty.

Please consider the decrease rates as a help towards our community.....even if its temporary. My family would be extremely thank full to you. Its killing us financially, everyday is a struggle.....but I have to keep smiling to my wife and children and pray we don't have any financial emergencies that I am clearly not able to cover.
