Sent: Tuesday, July 23, 2013 12:04 PM
To: Stump-Web
Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

marjorie Taylor
310 W Campbell Ave
Phoenix, AZ 85013-2919

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am extremely unhappy with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I regard this situation to be due in large part to APS's historic inability to explore viable alternatives to nuclear and hydrocarbon-fired power plants. I note that APS executives are some of the highest paid in the State and they should be held accountable for this mismanagement.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Susan Mcclees

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

As an APS customer, and someone who recently installed a Solar City panel array on our roof, I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Denise Hudson

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am VERY concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

I personally have a goal to use solar energy on my property in the next few years and without net metering, this might not be financially feasible.

Arizona's leadership on solar energy is critical to the future of our environment AND our economy!!! With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

We installed solar panels on our home this last year and part of our decision was that we would get credit for the additional energy generated by our panels. We even put up extra ones for that purpose. It will be very disappointing to us if this policy is reversed and would feel like a betrayal of the trust we put into the process of committing to solar energy as a personal contribution to providing sufficient energy to all of us.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Phoenix, AZ 85007

Dear Mr. Stump,

This is a form letter provided by Environment Arizona, but I have included my own thoughts in the first paragraph. Please do not dismiss this as just another vote for beating-up APS.

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid. Although, I understand that the compensation that they do receive is at a higher rate than is purchased from other sources. That part does seem unfair to APS. Perhaps this could be addressed.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Jane Chischilly

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I'm a local business owner in Phoenix and own a home equipped with solar power equipment. I've recently been informed by APS that because my home is solar powered, I'll actually have to pay more to APS in the near future. This is, frankly, an outrage. I've added solar power to my home for environmental benefit and for the promise of lowering my electricity bills through lowered consumption of APS generated electricity.

It is clear that APS is attempting to force further dependence on their service by attempting to find a way to discourage the public from going solar.

I've had enough of highly prosperous corporations making decisions that are simply bad for the public for the sake of making MORE profit. And, I'm tired of our leadership letting them do so. I ask you to, please, do the right thing and tell their lobby to take a hike.

Please accept these comments with reference to Docket E-01345A-13-0248.

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Jennifer Lootens

Dear Mr. Stump,

I am a Northern California transplant, 11 years in Arizona, I have been concerned about the environment for a very long time. I have been so proud of my new home state being progressive and forward-thinking about solar. Residents of this state have such an opportunity to go solar and reduce pollution. Listen to what taxpayers and people in this state want, not what APS wants. I am a homeowner and taxpayer, I want solar to stay.

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

It doesn't take much thought to know that the best thing to do in Arizona is to harvest the sunlight of the sun. Growing solar is also helping with supplying jobs! Jo Behrman

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

As a Small businessman, I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

In the face of global warming, utilities must recognize that Arizona's leadership in particular must protect incentives to transition to solar energy. If utilities are to get some relief from net energy metering, it should be temporary and conditional on an increasing percentage of their energy production being solar.

With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Dianne Douglas

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I do not completely understand the proposal by Arizona Public Service in regards to net metering. It may be a burden to the service companies to provide, install, and meter solar power, but it seems like the proposal they are suggesting will hinder the progress that has been made towards solar power. There has to be a way to find a middle ground where we can find effectively and efficiently provide power to our homes with clean energy such as solar, and at the same time keep businesses like APS and SPR functional. I am not a business woman, but I believe that there is a creative mind out there that can figure this out for the benefit for all, even if there have to be compromises on both sides

As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource.

Current proposals by APS would only limit the ability for citizens to take control over their own energy choices. I do not currently have solar energy, and changes in policies may prevent me from further exploring it as a viable option.

I urge you to consider all the ramifications of these laws before changes are made to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Victor Ong

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I was so pleased to put solar panels on my roof in central Phoenix earlier this year. It just made sense to do it--contribute to renewable energy, and lower my bills at same time. The cost factor--particularly running my meter backwards into APS--was the clinching factor for my decision to do it.

That's why I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona. Otherwise the incentive for homeowners like me to add solar to our systems will be eradicated for the many people who are now encouraged to join us in improving our energy efficiency.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona. We have solar electric and solar hot water. We end up getting a check from TriCo every year and we are saving a lot on our electric bill by using solar for our electric needs.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Kate Ravenstein

Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Frank Thody

Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

John M. Franklin

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

Having sold land to the windmill developers in California over a 15 year period, I am well aware of the machinations of the energy companies to undermine the rights of green developers. Their economic power vastly outranks that of the green companies. They are also subsidized by the oil energy. Need I say more?

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Dear Mr. Stump,

As a small business owner passionate about an economically healthier Arizona, I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. Net metering is win-win. Apparently Arizona Public Service doesn't want it, but perhaps APS needs to streamline efficiency rather than campaign against the policy that has most helped Arizona take the lead in solar. We must keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. I am a consumer who currently benefits from the net metering program and eliminating this program would essentially end the benefit for me and would discourage other citizens from participating in solar programs.

Arizona is a state that should be a leader in producing solar power and individually owned solar roof collectors are a great way to encourage individual citizens to participate in creating green energy.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona. It would be ridiculous not to do so.

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Bobbi Steinmetz

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. We rank no.1 in the nation proportionate to the population for solar installations. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices. Consider this:

if we ever experience cascading blackouts as happened on the West Coast several years ago, only those with solar panels will have electricity and be able to generate it for others.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Dear Mr. Stump,

I'm dismayed to see the ACC weaken or abandon policies that had set the state on a course toward the further discovery and development and growth of renewable energy sources. I'm writing to urge the Commissioners to deny the APS request for a tax on residential solar installations, and I urge them instead to support rooftop solar and net metering and other policies to place the state back on course toward the development of esp. the solar industry while reducing and eventually abandoning the use of nonrenewable energy sources..

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Krysia Solheim

Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Luann Carpino
PO Box 1572
Payson, AZ 85547-1572

Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid. We have supported their failed ventures into various schemes (Suncor) and continue to support Palo Verde. There is no reason for them not to use the one resource we in Arizona have an inexhaustible supply of--the sun.

Arizona's leadership on solar energy is critical to the future of our environment and our economy--and god only knows, we don't lead the nation in anything else. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource.

Current proposals by APS would only limit the ability for citizens to take control over their own energy choices. Furthermore it may allow APS to develop satellite power distribution within neighborhoods--a technology that is extremely cutting edge and only dreamed of in areas that do not have the advantage we in Arizona have with our available Solar Resources.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Robert Murch

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

Being an Arizona native, I recall efforts in the 1970s to advance solar energy. These efforts were unfortunately very short lived. Had they been pursued, we would now be a world leader in this renewable energy source, and our planet and our health would have reaped the benefits.

I am concerned that the *misguided business interests* of APS will again sabotage advancements. Net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices. I urge you to do what's right for Arizona citizens and keep policies like net metering in place.

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Max Sussman

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

It is understandable that APS would want to do away with net metering.

Net metering has encouraged thousands of Arizonans to put up solar panels, and more solar panels means more KWH produced where they are used, which means fewer KWH purchased from APS.

APS has made a big deal of the math involved in Net Metering, and has attempted to pull the wool over the eyes of policy makers, treating them like simple minded sheep to be manipulated with fancy words, complicated balance sheets, and a veritable slight of hand act.

Here are some simple concepts to keep in mind which will help keep Net Metering in place and thus ensure a fair compensation to those who can afford to go solar.

APS gets to charge 100% of their KWH fee to residents who purchase excess solar energy, yet APS does not have to pay the cost of GENERATION. In effect, APS is gaining this as extra income.

APS does not have to have as many power plants functional during peak times, as even when a residential solar array is incapable of handling high demand (such as during the summer months with high AC usage), the demand on the system is greatly reduced. This leads to lowered maintenance and fuel costs.

Solar power is produced during the day, when demand is peaked. Net Metering provides mostly night time power returned, when demand is lowest. This provides for more even power generation between day and night, allowing for reduced standby demand. (having a power plant online, but not generating, just in case more power is needed during the day.)

Solar power is produced all year long, not just during the summer. Yes, typically, customers utilize their net metering credits during the summer months to combat high power consumption from AC systems...

however, a well functioning AC system in an adequately insulated home does not function 100% of the time. Not only are there periods of over generation during the early morning, every moment the AC is not running, the solar system is putting power back into the grid.

When one considers all of the facts involved, APS does not lose money from Net Metering. APS loses money from not selling power to home owners who have Solar power.

APS has a failing business model. Technology has changed, and APS is struggling to keep up. Do not grant them the ability to stagnate the tremendous momentum we have built towards achieving a sustainable energy future for America.

We do not inherit the Earth from our ancestors, we borrow it from our children. Please help ensure there is a future for all our children.

Please keep net metering.

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I grew up in Arizona and as a child was very aware of the possibility of solar power and was excited about the possibility we had as a state to be a leader. Now, 60 plus years later I am disappointed and concerned that we are not taking it as seriously as we should. We need to be doing everything we can to support further development of solar energy for everyone.

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid. I find that when I conserve -- water, electricity, gas, etc. -- I seem to be punished rather than awarded. Why? Discounts and rebates are essential as is net metering.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona. Thank you for taking time to read this and thinking seriously about the consequences of eliminating net metering.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Subject: Stand up for Arizona's solar future

Jul 23, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.
