Nature of Complaint:

Docket No. E-01345A-13-0248

My Name is Jerald Johnson, I live at Surprise Arizona 85374
Today's date is July 17 2013. My phone number is

I would like make my voice clear that I am against APS changing the Solar Panel system. They are able to use our excess power and sell to areas of the country that need it the most. We are producing a lot of power in the Winter when this power is then sold to the East Coast.

Solar is expanding, soon there will be panels on probably every house in this country. This is the wave of the future. The cost are dropping and APS instead of trying to accept this are fighting to keep their profit margin at the same levels. If people go with evaporative coolers are they going to have a higher rate for electricity, since they don't use as much. We conserve for the Benefit of the planet and our own pocket book.

If APS wants to raise rates then raise them across the board, each and every customer should pay more. What power that is generated over and above what they use should be a credit for the homeowner. A lot of business have Solar Panels. Yet in their statement they are not going to raise rates on business. Why?

I have written to the Senators and the Department of Energy and the White House to complain about the actions of APS.

Jerald Johnson
