Nature of Complaint:

Docket No. E-01345A-13-0248

Dear Commissioners,

I have contacted a solar company for a proposal to install collectors on my roof here in Sun City.

It is for a 20 year lease on the equipment and of course shows I can "save" a few dollars a month in power costs, IF things go right for me over 20 years.

When I dug into the details it seems that the so called "savings" is based on some sort of non-solar users paying a bit higher price for power to subsidize those that have solar. In other words, the solar panels cannot be justified unless some of the cost is covered by OTS (other then solar) folks. I really do not like the idea of paying for someone else's "Tesla".

Question.....

Does solar pay for itself without the subsidy?

What is the formula to determine the cost of the KWH produced by solar?

Thank you

Robert Tomich
