Dear Corporation Commission,

I hope I am sending this to the correct division. If not, I'd be grateful if you'd forward it to the right people.

It has been widely reported in the press that Arizona Public Service Co. is proposing to charge customers who install rooftop solar panels \$50 to \$100 or more a month to cover the cost of maintaining the power grid. Reportedly, they will file a request to this effect with the Corporation Commission.

Solar power is a burgeoning industry that needs to be supported. Many other power sectors receive support either from public funds or by statute, including the oil and nuclear industries. I'm writing to urge you to deny this request by Arizona Public Service Co.

There is an argument that this type of market distortion is wrong. I understand that argument but the playing field is not level while other power sectors are the beneficiaries of similar market distortions (and direct injections of public funds).

By the way, I have no connection with the solar industry. I am writing this merely as a citizen who would like to see us get more of our power from solar.

Best Regards,

Gerry Morgan
Tucson, AZ
