ELECTRIC

I realize that you receive many emails from individuals and families opposed to the request from APS, I would like to add my name to the group opposing the change in the way solar power is administered in Arizona. It appears to be targeting the residential communities that support individual solar installations. This proposal is a slap in the face to the effort to promote homes with solar power installations. I believe that Arizona should support and promote any and all programs to enhance the amount of energy captured from the sun. This proposal is a bad idea.

Thanks for your time.

Steven Worden
