ARIZ CORP COMMISSION
DOCKET CONTROL

Memorandum

From the office of
Chairman Bob Stump
Arizona Corporation Commission
1200 W. WASHINGTON
PHOENIX, ARIZONA
(602) 542-3935
FAX: (602) 542-0752

TO: Docket Control

DATE: July 25, 2013

FROM: Trisha Morgan, Executive Aide

SUBJECT: Comment Letters
Arizona Public Service Company E-01345A-13-0248

Chairman Stump's office has received 79 significantly identical computer generated email communications regarding net metering. Attached is a sample of the email received. Be advised these letters were not distributed but that they are in the original file in Docket Control and available for your review.

Arizona Corporation Commission

DOCKETED

JUL 29 2013

DOCKETED BY

nr

Trisha A. Morgan

E-01345A-13-0248

From: Environment Arizona <action@environmentarizona.org> on behalf of Maxann Kasdan <mkasdan08@gmail.com>
Sent: Thursday, July 25, 2013 7:44 AM
To: Stump-Web
Subject: Stand up for Arizona's solar future

Jul 25, 2013

Mr. Bob Stump
1200 West Washington
Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Maxann Kasdan
1238 E Cambridge Ave
Phoenix, AZ 85006-1101

Phoenix, AZ 85007

Dear Mr. Stump,

Dear Corporation Commission,

I am concerned that Arizona Public Service wants to take away solar rights in Arizona, particularly with respect to net metering. As you know, *net metering* ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Solar energy is the key to a sustainable energy future for our planet. Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

Please use your position of leadership to do what is best for our state and our environment, rather than allowing energy companies to continue to profit at the expense of all of us. I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Sincerely,

Robert Caskey

Phoenix, AZ 85007

Dear Mr. Stump,

This is important!

A bright future for Arizona is at stake. Net metering may be the most effective grass roots pathway to encourage everyone to reduce the demand for new power plants, and the way towards independence from foreign influences.

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource.

Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Mark Losleben

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Lenore Kadish

Phoenix, AZ 85007

Dear Mr. Stump,

I am concerned with recent proposals by Arizona Public Service to take away solar rights in Arizona, particularly with respect to net metering. As you know, net metering ensures that consumers receive reliable and fair compensation for the excess electricity they provide to the grid.

Arizona's leadership on solar energy is critical to the future of our environment and our economy. With net metering in place, more Arizonans than ever can harness this clean and virtually limitless resource. Current proposals by APS would only limit the ability for citizens to take control over their own energy choices.

I urge you to keep policies like net metering in place to allow for a bright solar future in Arizona.

Please accept these comments with reference to Docket E-01345A-13-0248.

Sincerely,

Dusty Tyree
