Subject: Degregation issues

Dear Commissioners,
 My name is Albert E. Ellis, [REDACTED] Chandler, AZ 85226. I am aged 81 years, and a resident of Arizona since August, 2005.
 Today I received a phone (robo) call urging me to listen into a hearing regarding possible deregulation of power supply corporations such as, but not limited to, SRP and APS.
 A brief review of your website gave me a respect for the hundreds, if not thousands, of regulations you are responsible for. I would expect that the passing of time and changes in practices have, indeed made some regulations obsolete. However, every regulation, at one time had good reason. I urge you all to carefully consider the potential for abuse in the absence, or the weakening, of regulation.
 Thanks,
 Al Ellis

Subject: Deregulation

I read today that deregulation of electricity is being considered again in Arizona. I am opposed to deregulation. There are very few successes and many failures in deregulating the electric industry. Keep what we have.

Commissioner Bob Stump
1200 W. Washington - 2nd Floor
Phoenix, AZ 85007

Dear Commissioner Stump,

I'm sending you this email to ask that you please not deregulate Arizona's electricity system.

Many older Arizonans are on fixed incomes. We already face ever-increasing costs of living.

With our state's hot summers, power for cooling is not optional. Keeping the cost of electricity affordable should not be put at risk with "deregulation".

Why risk the safety and pocketbooks of Arizona's families and retirees?

Please oppose this experiment of "electric deregulation".
Thank you.

Sincerely,

Mr. Wilfred Long Jr.

LADIES AND GENTLEMEN OF THE ARIZONA CORPORATION COMMISSION;

The purpose of this letter is to express opposition to deregulation of utility rates under your jurisdiction in the state of Arizona. Not only could deregulation open doors to indiscriminate rate increases but choosing suppliers would be difficult, burdensome and maybe even impossible for many among us.

Electricity in our homes and work places is a public service; a necessity for our wellbeing. It only makes sense that there be some type of monitoring of the suppliers. Rate increases fall most heavily on the poor, elderly and the middle class.

Why not leave things the way they are where competent elected commissioners can keep rates reasonable and at the same time provide profits for the suppliers of the service.

Thank you for your time.

Ethel Tauchen
