To: Stump-Web
Subject: solar reform

Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don't pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers' excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That's why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Dear Commissioner,

Asking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare possible.

Paying customers supplying power wholesale and selling at retail is B.S.
And Government Must be Locked Out of my meter PERIOD.
How about we put a camera in Your bed room and put it on YouTube.

Rates must be fair to all customers as well as stopping net metering. Please support net metering reforms that will ensure fair rates for all customers and privacy not to mention POWER.

Thank you.

Dear Commissioner,

I am 82 and my husband will be 88 in Dec. We cannot sign up for 20 years for solar. Therefore we are subject to our electric bill going up again. our retirement is fixed so no raises to ,compensate for the raises ,we have added more insulation in the attic,went thru the APS thing where they came into the house checking for leaks and checked the tubing for air conditioner leaks.

Cannot think what else we can do to keep our cost down within reason.

Dear Commissioner,

The current net metering system is hurting Arizonans, particularly seniors and those on fixed incomes. We know that solar customers create their own energy, but they still rely on the energy grid to ensure they have power whenever they need it. When they don't pay for that service, the rates we pay go up. Furthermore, the current net metering policy requires us to pay five times the market value for solar customers' excess power.

We know why solar companies are against net metering reform – their bottom line. Forcing hardworking Arizonans to subsidize out-of-state solar corporations is the worst kind of corporate welfare. We support solar power and want it to be sustainable in the long term. That's why rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

Robert Wilson

Dear Commissioner,

I support net metering. It provides millions of dollars of benefit to the APS territory and encourages our booming solar industry.

Keep it going!

Thank you.
