Subject: net metering reform

Dear Commissioner,

Asking Arizonans to subsidize in-state or out-of-state solar corporations is the worst kind of corporate welfare. Solar corporations must be self sustaining, or their product is not worthwhile. It takes no ingenuity or acumen to run a business if the government (me) is paying the bills, and there is no incentive to operate efficiently.

Rates must be fair to all customers. Please support net metering reforms that will ensure fair rates for all customers.

Thank you.

To: Stump-Web
Subject: net metering reform

Dear Commissioner,

I am a solar customer. Last week APS reduced my reimbursement rate from 6 cents per kilowatt hour to 3 cents for energy I send to the grid. How did this happen behind closed doors? And why are you considering a change in net metering when APS changes the reimbursement rates on their own and without any announcement. By the way, when I am of the grid I pay 9-14 cents per kilowatt hour, while being reimbursed only 3 cents for what I send to APS. APS has clearly started a "class war" haves vs have nots, but the really amusing thing is that they are screwing all of us.

Dear Commissioner,

Please do not fall for all this garbage that APS is trying to pull over your eyes. This web site and several others are here to cloud the truth. We purchase our solar panels for out of pocket costs of \$28,000. We were told that with our system that we would be helping APS when critical peak times were high by providing energy to the grid. If they want to change the agreed amount that they told us they would be obligated to pay us, then they better come and purchase my system plus damages to my roof. Please don't listen to their lies. They are only trying to make more profits.

Dear Commissioner,

Asking Arizonans, and particularly those who are unemployed, under-employed, retired or otherwise on a fixed income to subsidize out-of-state solar corporations is the worst kind of corporate welfare.

Interest rates are at historic lows. If their business plan makes sense with regard to ROI, let these companies finance their enterprise through conventional risk/reward mechanisms. The track record of government support of this industry is dismal. Let the free market and capitalism work!

Rates must be equitable to all customers. Please support net metering reforms that will ensure equitable rates for all customers.

Thank you.
