Dear Commissioner,

I am completely against net metering, and all for APS' solar plan. I find it interesting that members of the TUSK coalition accuse APS of caring only for their business, their dime. Yet, I can guarantee more than half of these TUSK members are only advocating pro net metering because they need to keep their jobs and their dime! I 100% do not see the problem with APS' plan. It makes complete sense. And it's fair to all customers.

Dear Commissioner,

I am very concerned about the effects of net metering. I feel that it does not help Arizonans at all. Although solar customers do create and use their own energy, they still rely on the grid to have energy in the case that they don't have electricity. Also, if current solar customers are being protected by the "grandfathering" of their current contracts, why are they protesting APS' plan? To be paying five times the market value for excess power from solar users, is absolutely ridiculous when electricity bills in this Arizona heat are already at an all-time high. I vote FOR APS' plan and AGAINST net metering. Thank you.

Dear Commissioner,

I think APS' proposed plan is the fairest plan for all customers- current solar, future solar, and non- solar. I don't see the stance that TUSK holds as being solid, developed, sensible or stable. I do not support net metering and I think that it will hurt several Arizonans; definitely more than would be hurt by APS' plan. Many people can't afford to install rooftop solar systems;it makes no sense that non-solar users be punished with paying 5 times the market value for solar-users excess power. Outrageous.

Thank you for listening.

Dear Commissioner,

As an upcoming senior at ASU in August, I am moments away from being an independent, working citizen and also moments away from being directly impacted by healthcare reform, taxes and possibly, net metering. As my concerns become more relevant, I want to express that net metering will hurt me, and Arizonans alike. With an entry-level salary post-graduation, I will not even have the option to produce my own solar energy, simply because the panels and installation are too costly. Yet, I will be obligated to pay a higher rate than solar customers, especially when saving money is a priority right out of college. I will have student loans, several dwelling costs and the day-to-day costs of living. I cannot afford a drastic hike in my electricity bill, especially when solar customers are unaffected. I am against net metering.
