RE: Docket # E00000 C-11-0328

Dear Elected Commissioners:

I use that term because that is who you are suppose to be, Servants of the people who entrusted you to work for them, and protect us from those who would impose policies on us for the sake of greed.

I as well as thousands others like me, grew up in a country that had freedom of choice in everything we do.

I see that eroding in every form of Govt.

Your decision of Aug 5th this month is a prime example of that.

I took the time as a concerned volunteer, to get out in my community and gather signatures for a petition against the way this Smart Meter program is being implemented. This took a number of hours, gas and determination to let people know what I have learned from researching this project.

I wasn't the only concerned individual; there were others who gave of their time, in Sedona, Payson, and a number of complaint letters.

I wasn't surprised to find that most of the people I talked to, didn't even know that they had a right to opt out of this project.

This is because APS wants it that way; they use scare tactics, like if you do try to opt out, and you are told it is going to be costly to do so.

This to me is like blackmailing the people to get what you want.

I have written my congressmen about this only to have it passed on to you .I am very concerned that this is going to lead to higher utilities for a lot of single mothers, elderly people on fixed incomes and benefitting only APS.

I am pleading with you on behalf of the people of this great State ,to put a moratorium on this project until such time the issues that have not been answered for health issues, fire dangers ect ,can be resolved.

It makes no sense to allow the continued installation of these meters knowing you could be jeopardizing people's health and safety.

This is where an organization like yours is suppose to come to the aid of the people you serve, and not take a back seat approach as was the case Aug. 5th.

Sincerely,

A handwritten signature in cursive script that reads "John Lee".

John Lee
