Reservation Submitted

AZ CORP COMMISSION
DOCKET CONTROL

Thank you for submitting an application to the APS Renewable Energy Program.

IMPORTANT NOTICE

DEADLINES FOR NET METERING GRANDFATHERING

Deadline for contract and interconnection application is October 15th 2013. All applications for grid-tied renewable energy systems need a signed contract* and an interconnection application submitted before midnight October 15th to be eligible for the current APS net metering rider.

Systems must be installed within 180 days. Customers seeking an incentive and who have submitted their contract and interconnect applications by October 15th must have systems installed within 180 days of reservation approval to be grandfathered into the current net metering program; customers not seeking an incentive will be required to have their system installed within 180 days of application approval to be grandfathered.

*For interconnect-only customers not seeking an incentive: if you are self-installing, you may apply to interconnect without an executed contract, but you must also email renewables@aps.com to certify that you intend to meet the interconnect application and installation milestones, and that you understand that failing to meet the milestones disqualifies you from the current net metering program.

Regarding the application you have just submitted, which is **reservationID*******: we will notify you by e-mail if additional information is needed. If you have authorized us to share information with your installer or dealer, we will copy them on all correspondence.

Click here for [next steps](#).

If you need to make any amendments to your application, this may affect the amount of your incentive.

Check the status of your incentive application at any time by logging into your aps.com account and going to "my rebates & renewables."

Questions or amendments? Contact us at (602) 328-1924 or by e-mailing renewables@aps.com. Thank you!

Thank you for using aps.com.
