**Subject:** Don't Hinder Rooftop Solar

Dear Chairman Stump,

The Arizona solar industry is fast becoming a national leader, providing more than 10,000 jobs and boosting Arizona's economy with many small businesses. This comes at a critical time in our nation's energy history, when we must do all we can to promote a switch to clean, renewable energy sources that will increase our energy independence and help avert potentially disastrous climate change.

The Arizona Public Service (APS) proposal to dismantle net metering and effectively place steep new costs on rooftop solar is the exact opposite of what our state and our nation need at this critical juncture. Saving money on electric bills is a key motivation for the installation of rooftop solar systems. It makes no sense to harm this industry just to protect the profits enjoyed by APS.

Please say no to APS' effort to cripple Arizona's growing solar industry. This proposal harms consumers and competition for the sake of nothing more than serving APS' bottom line.
