Re: Docket # E-00000W-13-0135

Dear Chairman Stump,

I support your efforts to examine the potential benefits of allowing Arizona consumers to have the ability to choose their own electric provider, rather than being forced to use the utility monopoly.

Competition works in all industries to drive costs down, improve service and increase consumer options. There is no reason it will not work here as it has in other States. For example in Texas in the past 10 years, 85% of commercial and industrial customers switched from their former supplier to another source. As well 40% of the residential customers also did opt to change suppliers.

I know that AARP has weighed in against electric competition. They do not speak on behalf of Arizona's retirement community. I urge you to reject their scare tactics.

Thank you.

Re: Docket # E-00000W-13-0135

Dear Mr. Stump,

As we travel around the country in our motor home, I stay apprised of happenings in Arizona. I've recently learned of efforts to lobby against deregulation of Arizona's electric utilities. I'm not at all pleased with AARP's support of electric regulation in Arizona. The facts are contrary to AARP's position that deregulation will increase rates. When customers have choices, competition raises, the market expands, leading to improved quality and reduced prices.

AARP does not speak on behalf of Arizona seniors and I strongly support our ability to choose our electric provider.

Sincerely,

Mike Kapic

Commissioner Bob Stump
1200 W. Washington - 2nd Floor
Phoenix, AZ 85007

Dear Commissioner Stump,

I'm sending you this email to ask that you please not deregulate Arizona's electricity system.

Many older Arizonans are on fixed incomes. We already face ever-increasing costs of living.

With our state's hot summers, power for cooling is not optional. Keeping the cost of electricity affordable should not be put at risk with "deregulation".

Why risk the safety and pocketbooks of Arizona's families and retirees?

Please oppose this experiment of "electric deregulation". Thank you.

Sincerely,
Eugene Passman
