OPPOSE

We are totally against this docket as we installed solar panels in order to cut the cost of our electricity and to be environmentally conscious. We paid a lot of money to install our solar panels and now you are considering changing the net metering so that we will have to pay \$50 to \$100 a month. This is not right to those of us who went through the expense of installing solar panels. By doing this, you will be taking away the incentive for people to install solar panels. It is to the state's advantage to have more homes using solar electricity. This measure will dissuade citizens from becoming more self-reliant and technologically progressive and increase the state's debt. Do not make this mistake.
