Received the following -

Although we are Grandfathered in as Solar customers, this proposed change shouldn't affect us, but we have several friends that are contemplating having Solar installed on their homes. If you grant this proposal from APS then our friends will definitely drop the idea of going Solar, as it will not be cost effective for them. That would be a shame as going to Solar only helps in lessening our dependency on fossil fuel.

In addition, if this proposal goes through what is to stop APS from coming back to get another bite of the apple and come after the rest of us that are Grandfathered in? We happen to think that APS, in the beginning, thought it was a great idea to do this, but as more and more people signed on, it became apparent to someone in management that APS screwed up and could've had a windfall had they not signed on to the Solar deal.
