RE: Opposition to Docket Numbers W-03514A-13-0111 and W-03514A-13-0142 (consolidated)

Dear Judge Nodes and Commissioners,

Over the weekend, I looked at the Arizona Department of Water Resources (ADWR) website at the specific wells that are listed for the community Mesa del Caballo (MdC). Attached is a spreadsheet with all data downloaded from the ADWR website as of 10/5/13, titled "WellRegistryExport10_5_2013".

From the attached, you will note that there are 60 wells currently in MdC. The ADWR Well Registry Export Report shows 6 of those wells owned by Payson Water Company (PWC). On pages 3 and 4 you will see the pump rates listed for the wells. All 6 of the wells owned by PWC appear to be capable of producing water at various rates from 7 gpm to 22 gpm. Furthermore, you will see numerous other private wells listed that are productive, including 3 productive wells that were installed within the last year or so.

Based on this data, I am strongly opposed to any action towards financing approval or rate hikes to facilitate a plan to hookup MdC to the Town of Payson for accessibility to water from the Cragin pipeline until alternate cost/benefit analyses can be performed. I would like to see the ACC evaluate current test data for PWC wells to show how much water they are actually producing, as there appears to be discrepancies between what was reported in the filing of the rate case on 04/22/13 as Exhibit A and what the ADWR has listed for test pumping rates of PWC wells. I would also like to see PWC enter into additional water-sharing agreements with other private well owners, as this is a very inexpensive way to bring more water online to the community very quickly.

As per the Commission's stated intent, please try your best to balance the customers' interest in affordable and reliable utility service with the utility's interest in earning a fair profit.

Sincerely,

Kathleen M. Reidhead
