**Subject:** Save net metering (Docket E-01345A-13-0248)

Oct 17, 2013

Commissioner Bob Stump  
AZ

Dear Commissioner Stump,

I am writing in opposition to the proposals from Arizona Public Service that would severely cut the amount solar customers can save on their electricity bills through net metering.

As you know, net metering allows solar customers to receive credit on their electricity bills for each kilowatt-hour of electricity generated by their solar panels. Net metering is critical to providing customers the opportunity to choose to power their home or business with solar energy and to growing the solar industry in Arizona. The changes that Arizona Public Service proposes would dramatically reduce the economic incentives for Arizonans to go solar, which would jeopardize the growth of solar energy in Arizona.

Your own staff has recommended that you reject APS's proposal to dramatically reduce net metering incentives prior to conducting a cost-effectiveness analysis as part of a general rate case.

Please protect the right of Arizonans to use solar energy by opposing Arizona Public Service's current proposals to change net metering rules.

Sincerely,

Mr. Caleb Laieski  
  

Phoenix, AZ 85012-7804
