Mr. Bradley Morton,

I'm writing about this water increase that White Hills Water Company (Dave Arthur owner). This man has done nothing to improve the water conditions here in White Hills Unit 1,3,4. The water tank is to small for the customers the pipes from the tank to the main feed is to small he never replaced it to meet your standers, There are PVC pipes in some areas and they never were replaced and the people should not drink the water from these pipes, Like your office and Dave Arthur owner of White Hills water Company said we are working on it that has been that way for about more 10 years. The water in the pipes should be back washed I've been here for 7 years and they never back washed the pipes and the water smells. Mr. Arthur keeps getting a pass on just about everything from your office he never did anything to fix the issues here in White Hills. Your office keeps saying you are working on it just how long do you need to work on any problem ? You have been working on this for 7 years since I've been here and Dave Arthur keeps saying he is working on it which is BS he will never fix the problems because your office lets him get away with it. Send someone down here count the meters and don't take his word you have to count them and you will see the Tank is to small. What you should do is take the company away from him and have the state run it and fix the problems Mr. Arthur owner of

White Hills water Company will never fix the problems here and your office keeps giving him a pass why?

In some areas if someone is washing dishes and the house next door can not take a shower until the dishes are done from the people next door Is that the way the State of Arizona operates letting the people suffer because White Water company will not fix any issues hers?

**White Hills Water Company does not deserve a rate hate what you should is have him give the customers a refund for being a Slum Lord in the water business. Come down and you can see for yourself.**

White Hills Unit 2 water rates \$35.00 per month for 9,000 gal of water
