Comments: My wife and I are both retired and live in our primary residence listed above. We have a great concern of the RFI emissions as alleged on the record to date. Our bedroom is a common wall between the Smart Meter and where we sleep. We have had to start sleeping aides to stay asleep since we received the smart meter. We will request to have it removed by the power company utility. APS. Why were there no health effect studies prior to the program to replace perfectly functioning metering devices?
