RE: Net Metering Costs to Non-Solar Customers (Docket No. E-01345A-13-0248)

I was very disappointed when I talked to a friend of mine who has installed solar panels and she wanted to know the difference in our electric bills. I was amazed at how much less her bill was than mine and that I am paying more to subsidize her.

This doesn't seem fair. Can you explain this to me? Why am I having to pay the difference for her? What can you do about this for the future? We can't continue carrying the load for people who have solar panels? If so, can I get help to have solar myself?

The 28 Individuals below have the same or similar comments regarding the net metering cost shift solution:
