BRENDA BURNS PROPOSED AMENDMENT NO.

0000149450

TIME/DATE PREPARED: Tuesday, November 12, 2013

COMPANY: Arizona Public Service Company

AGENDA ITEM NO. 11

DOCKET NO(S). E-01345A-13-0140

OPEN MEETING DATE: November 13-14, 2013

Page 10, line 28, after "2014" INSERT:

"However, we do not believe that approval of the final 50 MW phase of AZ Sun is warranted at this time. We have reason to believe that APS may already be able to meet its obligations, under the 2009 Settlement Agreement, to achieve 1.7 million MWh by December 31, 2015. According to information submitted by APS in its 2014 Application, (Exhibit 2B), there could be enough distributed generation that will enable APS to meet the required target. We think it would be more prudent to wait until sometime in 2014 to determine whether or not the final 50 MW are actually needed for compliance purposes. In addition, SEIA, in a filing on October 9, argued that "APS's Plan should include 25 MW of wholesale PPA projects." We believe that is a discussion worth having, and possibly exploring sometime next year."

Page 12, line 15, DELETE "approved" and REPLACE with:

"not approved.

IT IS FURTHER ORDERED that when Arizona Public Service Company files its 2015 REST Implementation Plan, it shall include a discussion of whether or not it needs to install any additional capacity under AZ Sun in order to comply with the REST Rules and the 2009 Settlement Agreement. This discussion should also examine cost effectiveness and contrast the merits of AZ Sun with 3rd Party ownership."
