**BITTER SMITH PROPOSED AMENDMENT NO. 2**

0000149470

TIME/DATE PREPARED: November 12, 2013, 10:00AM

COMPANY: Arizona Public Service Company

AGENDA ITEM NO. 10

DOCKET NO(S). E-01345A-13-0248

OPEN MEETING DATE: November 13-14, 2013

This proposed amendment finds that there is a cost shift from DG customers to non DG customers and sets forth specific requirements for the net metering workshops.

INSERT new FOF 49 and renumber accordingly:

49. In light of the record before us, we find that the proliferation of DG installations results in a cost shift from APS's DG customers to APS's non DG residential customers absent significant changes to APS's rate design.

INSERT new additional sentence at end of Ordering Paragraph, page 21, line 21:

The workshops shall be based upon the Commission's determination that reflects a cost shift from DG customers to non DG residential customers, and that the Commission's future full consideration of the net metering cost shift issue would benefit from the development of a method(s) by which the value of DG can be considered in the balancing of the public interest, and can evaluation of the role and value of the electric grid as it relates to rooftop solar, other forms of distributed generation and customer-sited technology generally.
