Arizona Corporation Commission

DOCKETED

NOV 14 2013

Received 26 letters in opposition all with similar wording as the following -

Dear Corporation Commission,

DOCKETED BY

I urge you to protect solar progress and a strong rooftop solar program in Arizona.

As one with roof top solar I greatly resent the misleading and untruthful ads which are being broadcast concerning APS and solar energy. This month I produced 1188 kWh . I used 264 kWh. I paid \$24.34 for account, surcharge, metering, meter reading , billing, reguatory tax, State tax, County tax, City tax and franchise fee. APS MAKES money from my solar panels! Do not allow shortsighted descision making to damage a safe, sensible , clean and cost effective energy.

Arizona is now the national leader in solar energy production per capita due to the "net metering" policy that allows customers who have installed solar on their homes or businesses to receive fair market value for any excess energy that is sent back into the grid.

The net-metering policy produces substantial benefits. Solar producing customers are compensated fairly for excess energy generated. Other utility customers benefit by receiving clean, renewable energy through the grid. Progress in solar energy also reduces the need for costly new power plants and transmission lines, creates high-paying local jobs, and results in cleaner air for people and our environment.

The Commission's staff recently recommended that the ACC reject Arizona Public Service and instead address issues in 2016 in the next APS rate case. I encourage you to do that and to continue supporting progress in the rooftop solar program. With more than 300 days of sunshine each year, Arizona should be a leader in solar

energy. Solar is a win-win for Arizona, and net metering is an essential part of that.

Please oppose proposals by Arizona Public Service to overturn Arizona's net-metering policy.
