ORIGINAL

O Dear Commissioners,

2013 DEC 3 AM 9 17

Clarity of the very long list of egregious & heinous trespasses against the People regarding "smart" meters is finding an ever widening circulation. I'm certain you are aware of this. By now you may even realize these grave and destructive bio-hazard/surveillance devices aka "smart" meters, equally pose threats to the very quality of your own lives and the ones you love. Never in the history of Mankind has any such insanity ever come to be.

Well documented, this information is burgeoning on your docket. You must take heed at once. Nothing less than a cease & desist order will do. It's a good thing to stop a bad idea! Taking a leading position in turning around this outrageous debacle will be a huge feather in all of your caps. Reducing the scope and magnitude of the suffering you have caused and are still participating in. This violent violation of the People, for whatever reasons conjured up, CANNOT STAND!

Admit your mistakes so you can start cleaning up this mess. The longer you wait, the more lies you will tell. You are doing irreversible damage to so many. The weight of which is squarely on your shoulders. It is by law your responsibility to regulate Utility Companies for the protection of the People. You are failing miserably at your sworn duty.

You did NO proper research on this most important matter. The People have worked very hard providing you with excellent documentation on every front of this debacle that you allowed to be implemented. It is becoming clearer every day that this be not bungling incompetence; but *corruption*. You are completely mistaken to believe your heinous lying, in blatant violation of the People, would go unnoticed.

You can still turn this around with immediate action. Without which, the People will then have to do this themselves. The choice is up to you for now. But the real power, as always, is in the hands of the People. Slowly but surely the People are realizing the horrific depth & extent of all the lying and misinformation you have allowed regarding so called "smart" meters. Rectifying this fiasco will be no walk in the park however this mess gets cleaned up. *Please!* do what's proper here. Put the analogue meters back in place and restore order. It's ill advised to keep pushing the People till they storm the Bastille. Way past the time to get serious about doing your jobs!

Advocating NO violence, working to rectifying this egregious debacle - in self defense - your allowing the forced deployment of this ill-conceived "plot" against the will of the People, is definitely a form of violence. It needs to stop immediately! Blow the whistle loud & long. Time to name names and rout out the sources of this lying - shining brightly the light of truth upon this evil. Be not afraid! Lying to yourselves is very damning to the self. It's never too late to change the path you're on. *I wish you Godspeed!*

Sincerely,

Stan Kingman
