DOCKETED BY *nr*

Re: AT&T Corp. Docket No. T-20872A-13-0368

Enclosed for filing with the Commission are an original and thirteen (13) copies of revisions to AT&T Corp's ("AT&T") Private Line Services Tariff- Schedule 9. The purpose of this filing is to modify terms for the Intrastate Private Line Service. Customers may not establish new term plans of any length on the plan at speeds of T45 (45Mbps) and below, existing term plans may not be renewed. For new service after any term expiration, the service will be provided only on a month to month basis.

The impacted tariff and price list pages are included as Attachment A to this Advice Letter.

The requested filing date is October 31, 2013 with an effective date of December 1, 2013.

If you have any questions or concerns, please call me at (775) 333-3991.

Sincerely,

Janice L. Ono
by *Lori Hioso, w/ permission*

7. ACCUNET[®] T1.5 SERVICE-INTEROFFICE¹

(T)

7.1 GENERAL

An ACCUNET T1.5 Service provides for the transmission of 1.544 Mbps digital signals over terrestrial channels.

An ACCUNET T1.5 Service uses one of two types of DS1 signal formats. They are:

-A framed DS1 signal format (D4 or ESF), and

-An unframed DS1 signal format for U.S. Government Agencies only.

Customers (except U.S. Government Agencies and others furnishing service to U.S. Government Agencies) are required to select either D4 format or where available, the Extended Superframe (ESF). The D4 format is described in Technical Publication-PUB 62411 and ESF is described in Technical Publication-PUB 54016, (see Technical Publication Information in Preface). U.S. Government Agencies may obtain ACCUNET T1.5 Services free from any format constraint by notifying AT&T of such an election at the time service is ordered.

7.1.1 DESCRIPTION

ACCUNET T1.5 Services are configured by furnishing office functions or by combining components to connect customer locations within the State of Arizona. ACCUNET T1.5 Services are furnished on a two-point basis only. ACC Business, a non-AT&T branded division, is introducing intrastate private line products. All terms and conditions, rates and charges are identical to the existing AT&T ACCUNET T1.5 Services offered in this tariff.

(M)

(M) - Material moved to Section 7 Page 1.1

(N)

7.1 GENERAL

(N)

7.1.2 SIGNALS AT THE CENTRAL OFFICE CONNECTION

(M)

All signals generated by Local Channels or other access and presented to the Central Office connection at an AT&T Central Office must meet certain signal and format constraints. Some of these constraints are listed below. Additional details are set forth in Sections 5 through 8 of Technical Publication-PUB 62411 (see Technical Publication Information in Preface).

A. SIGNAL AND FORMAT CONSTRAINTS FOR FRAMED AND UNFRAMED DS1 SIGNALS

- Data Rate: 1.544 Mbps +/- 75 bps.
- Consecutive Zeros: No more than 15 consecutive zeros may be generated.

B. FORMAT CONSTRAINT FOR FRAMED DS1 SIGNAL

- F Bit Position: This framing constraint requires the use of every 193rd bit position for framing, error detection, signaling and the transmission of other network control information.

8. ACCUNET® T45 SERVICE-INTEROFFICE¹

(T)

8.1 GENERAL

ACCUNET® T45 Services provide for the transmission of 44.736 Mbps digital signals.

ACCUNET® T45 Services use a framed DS3 signal format. When used to carry Multiplexed DS1 Channels, the signal carried within the framed DS3 format must contain Extended Superframe Formatted DS1 channels, to a maximum of 28.

8.1.1 DESCRIPTION

ACCUNET® T45 Services are configured by combining service components to connect customer locations within the State of Arizona. ACCUNET T45 Inter-office Channels are furnished on a two-point basis only.

8.1.2 SIGNALS AT THE AT&T CENTRAL OFFICE

All signals carried by local channels or other access and presented to the AT&T central offices must meet certain signal and format constraints. These constraints are described in the following Technical Publications (see Technical Publication Information in Preface).

- CB119 - Interconnection Specification for Digital Cross Connects
- PUB 43802 - Digital Multiplexer Requirements and Objectives
- PUB 54014 - ACCUNET T45 Service Description and Interface Specifications
- PUB 54014, Addendum 2
- PUB 54016 - Requirements for Interfacing Digital Terminal Equipment to Services Employing the Extended Superframe Format.

9. ACCUNET® SPECTRUM OF DIGITAL SERVICES (ASDS) -INTEROFFICE¹

(T)

9.1 GENERAL

ACCUNET Spectrum of Digital Services (ASDS) affords a Customer the opportunity to select channels at various digital speeds.

9.1.1 DESCRIPTION

ASDS is suitable for the simultaneous two-way transmission of data at synchronous speeds of 9.6 kbps, 56 or 64 kbps.

ASDS connects customer locations within the State of Arizona. ASDS may be two-point or multi-point. ACC Business, a non-AT&T branded division, is introducing intrastate private line products. All terms and conditions, rates and charges are identical to the existing AT&T ACCUNET® Spectrum of Digital Services offered in this tariff.

The transmission specifications and performance parameters for 56 or 64 kbps service are contained in Technical Publications-PUB 43202 and PUB 62310.

Interface specifications for ASDS are contained in Technical Publication-PUB 62411. (See Technical Publication Information in Preface).

Performance Parameters for 9.6 kbps and 56/64 kbps between AT&T central offices:

Airline Miles	% Availability	% Error Free Seconds
0 - 250	99.85	99.96
251 - 1000	99.80	99.86
1001 - Over	99.75	99.75

10. DATAPHONE[®] DIGITAL SERVICE^{1, 2}-INTEROFFICE

(T)

10.1 GENERAL

A DATAPHONE Digital Service is suitable for the simultaneous two-way transmission of data at synchronous speeds of 9.6 kbps.

10.1.1 DESCRIPTION

DATAPHONE Digital Services are configured by combining components to connect customer locations within the State of Arizona. DATAPHONE Digital Services are also provided between AT&T Central Offices and points of connection. DATAPHONE Digital Services may be two-point or multipoint. ACC Business, a non-AT&T branded division, is introducing intrastate private line products. All terms and conditions, rates and charges are identical to the existing AT&T DATAPHONE Digital Services offered in this tariff.

(M)

(M) - Material moved to Section 10 Page 1.1

(M)

¹DATAPHONE Digital Services may no longer be ordered for new Customers or for additional orders received from existing Customers after September 15, 2003. DATAPHONE Digital Services in place or on order before September 15, 2003 will remain in effect until discontinued or canceled by the Customer.

²Effective December 1, 2013, customers may not establish new term Plan of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis. 10.1 GENERAL (continued)

(N)

10.1.2 REGULATIONS

(M)

In addition to the regulations in Section 2, preceding, the following apply.

A. AVAILABILITY OF DATAPHONE DIGITAL SERVICE

DATAPHONE Digital Services are available from the AT&T Business Services Guide. DATAPHONE Digital Services may not be available in every LATA or to all rate center areas within a LATA and is dependent on the availability of suitable access.

B. CREDIT ALLOWANCES FOR INTERRUPTIONS

Credit allowances for interruption of service will be applied in accordance with the regulations as set forth in Section 2.4.6, General Regulations, preceding.

C. CONNECTION TO OTHER SERVICES

When a DATAPHONE Digital Service is connected to other services as indicated in the following, the design objective applies only to the DATAPHONE Digital Service.

1. Voice Grade Services

A Voice Grade Service used for the transmission of analog data at 9.6 kbps may be connected to a DATAPHONE Digital Service through a Voice Grade Analog/Digital Converter as shown in Section 12.2.4 following. The appropriate office connections are also required.

12. MISCELLANEOUS FUNCTIONS AND ARRANGEMENTS¹

(T)

12.1 GENERAL

This section contains miscellaneous functions and arrangements that are provided for use with private line services offered under this tariff.

12.1.1 REGULATIONS

In addition to the regulations in Section 2 preceding, the following applies.

MINIMUM PAYMENT PERIOD

Unless otherwise specified for an individual case, miscellaneous functions and arrangements are furnished for a minimum payment period of one month.

12.2 MISCELLANEOUS ARRANGEMENTS

12.2.1 1 X N CONTROL ARRANGEMENT

This arrangement enables the Customer to control up to 48 switching or transfer functions (e.g., switching or transfer arrangements to Voice Grade Services) at an AT&T Central Office via a remote keyboard terminal capable of either 300 or 1200 bps operation.

Access to the Control Arrangement requires an appropriate channel (e.g., local exchange line).

The Control Arrangement must be located in the same AT&T Central Office as the switching or transfer functions which it controls.

	Maximum Monthly Rate ²	USOC
Per Arrangement	\$161.70	3DY

(T)

¹Effective December 1, 2013, customers may not establish new term Plan of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis.

13. ADDITIONAL ADMINISTRATIVE AND OPERATIONAL FUNCTIONS¹

(T)

13.1 GENERAL

This section contains the rates and regulations for Additional Administrative and Operational Functions that may apply in connection with the installation, operation and maintenance of a private line service. The additional functions will be provided only when specifically ordered or requested by the Customer.

All of the Additional Administrative and Operational Functions are subject to the availability of personnel and equipment. In furnishing these functions, AT&T does not assume any additional responsibility for the through transmission of signals beyond that set forth in the following:

AT&T is responsible for engineering, operating and maintaining the private line services it provides. It is also responsible for the quality of transmission or signaling on private line services it provides.

13.1.1 TESTING FUNCTIONS

At the Customer's request, AT&T will review test results and participate with the Customer in a design review, technical analysis or testing.

A. REVIEW OF OTHER ACCESS TEST RESULTS

At the Customer's request, AT&T will review the results of tests of a Customer-provided access that is connected to a private line service. (The Customer must arrange for those results to be furnished to AT&T.) Where appropriate, AT&T will recommend additional tests to be performed on the Customer-provided access.

Review of test results will only be provided when the Customer agrees, in advance, to pay the charges for the review.

The rates for Review of Other Access Test Results are:

	Maximum Charge ²	USOC
Per Person, First Half Hour or Fraction Thereof	\$107.64	NRZT1
Per Person, Each Additional Half Hour or Fraction Thereof	\$58.85	NRZT2

(T)

¹Effective December 1, 2013, customers may not establish new term Plan of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis.

9. ACCUNET® SPECTRUM OF DIGITAL SERVICES-INTEROFFICE (continued)

ANALOG MULTIPOINT CHARGE

PER TERMINATION MONTHLY RATE	(D)
\$3.30	(D)

INSTALLATION CHARGE WAIVER

Installation charges will be waived for the Access Connection, Function Connection, D6 Inter Office Channel (IOC) Data Conditioning and the Local Channel and Access Coordination Function (provided under AT&T's Arizona Private Line Price List Local Channel Services Schedule 11) for Customers who order new ACCUNET Spectrum of Digital Service (ASDS) with IOC, used in conjunction with Voice Grade Local Channel Service (VGLC), or ACCUNET Generic Digital Access Service (GDA). Installation charges for the Voice Grade Local Channel C and D Type Data Conditioning are included.

In order for a Customer to qualify for the waived installation charges when ordering a new Terrestrial 1.544 Mbps Local Channel Service, the Terrestrial 1.544 Local Channel Service must be connected through the M24 multiplexing office function to a minimum

of two new ASDS IOCs at speeds of between 56 kbps and 64 kbps and the IOCs must be ordered simultaneously with the new Terrestrial 1.544 Mbps Local Channel Service.

Excluded from the installation charge waiver are:

- IOC or Local Channel signaling capability
- Replacement of existing service with a service of the same type and speed
- Additions to and/or rearrangements to existing services
- Digital Data Local Channels

A Customer who discontinues service prior to 12 full months will be billed for the waived charges.

However, a Customer may discontinue service without liability for waived charges to (1) replace a Voice Grade Local Channel Service with a digital service or (3) replace a digital service with a new digital service of a higher speed.
