DOCKET CONTROL

Advice No. 730

Arizona Corporation Commission
ATTN: Docket Control
1200 West Washington
Phoenix, AZ 85007

Re: AT&T Corp. Docket No. T-20872A-13-0369

Enclosed for filing with the Commission are an original and thirteen (13) copies of revisions to AT&T Corp's ("AT&T") Private Line Services Tariff- Schedule 11. The purpose of this filing is to modify terms for the Intrastate Private Line Service. Customers may not establish new term plans of any length on the plan at speeds of T45 (45Mbps) and below, existing term plans may not be renewed. For new service after any term expiration, the service will be provided only on a month to month basis.

The impacted tariff and price list pages are included as Attachment A to this Advice Letter.

The requested filing date is October 31, 2013 with an effective date of December 1, 2013.

If you have any questions or concerns, please call me at (775) 333-3991.

Sincerely,

Janice L. Ono
Lori Gioso, w/ permission

SECTION 1 - APPLICATION OF TARIFF

1.1 General Information (continued)

1.1.3 Territory Service - Services Rendered - Rates and Regulations

The Company renders private line services and channels throughout the territory served by it as shown in its tariff schedules which include a description of the service furnished filed herewith.

Service is furnished to service points within the State of Arizona. Such service points are set forth in the AT&T Business Services Guides.

The procedure which will be followed by the Company in rendering service is set forth in Section 2 which includes definitions explaining phrases and terms used.

Each tariff page bears an issuing date and the date upon which it became effective.

1.1.4 Availability of Tariff Schedule Pages

Current Tariff Pages

A. Current Tariff pages Approved and Accepted by the Arizona Corporation Commission:

1. The master copy of each tariff page with the effective date is filed at the Company's headquarters building, 795 Folsom Street, San Francisco, California 94107.
2. Copies of each effective tariff page accepted and approved by the Arizona Corporation Commission may be obtained at a charge from tariff vendors. A list of the vendors may be obtained by writing:

Staff Manager - Tariff Administration
AT&T Corp
795 Folsom Street, Room 250
San Francisco, California 94107

- B. Interested parties may obtain copies, when filed by the Company, of a specific advice letter and each associated tariff page, or a copy of all subsequent advice letters and their associated tariff pages for specified schedules on an annual basis, at a charge as shown in 1.(b) preceding.

1.1.5 Availability of Terms

Effective December 1, 2013, customers may not establish new term plans of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis.

SECTION 6 - ACCUNET® T1.5 LOCAL CHANNEL SERVICES

(N)

6.1 General (continued)

(N)

6.1.1 Description (continued)

(N)

ACCUNET T1.5 Local Channel Service may be furnished (1) between customer locations within the State of Arizona or (2) solely as an access coordination function.

(M)

The Customer is responsible for providing Channel Service Unit Functionality at each local channel service termination on a Customer's premises.

ACCUNET T1.5 Local Channel Services use one of two types of DS1 signal formats. They are:

- A framed DS1 signal format (D4 or ESF), or
- an unframed DS1 signal format for U.S. Government Agencies only.

Customers (except U.S. Government Agencies and others furnishing service to U.S. Government Agencies) are required to select either D4 format or where available, the Extended Superframe (ESF). The D4 format is described in Sections 7 and 8 of Technical Publication-PUB 62411 and ESF is described in Technical Publication PUB 54016. U.S. Government Agencies may obtain ACCUNET T1.5 Local Channel Services free from any format constraint by notifying AT&T of such election at the time service is ordered.

CANCELS ORIGINAL PAGE 1

SECTION 7 - TERRESTRIAL 45 MBPS LOCAL CHANNEL SERVICES¹

(T)

7.1 General

A Terrestrial 45 Mbps Local Channel Service provided for the transmission of 44.736 Mbps digital signals.

Terrestrial 45 Mbps Local Channel Services use a framed DS3 signal format. When used to carry Multiplexed DS1 Channels the signal carried within the framed DS3 format must contain Extended Superframe formatted DS1 channels, to a maximum of 28.

7.1.1 Description

A Terrestrial 45 Mbps Local Channel Service provides a digital channel for the two-way simultaneous transmission of signals at the DS3 rate of 44.736 Mbps. The transmission specification standards for Terrestrial 45 Mbps Local Channel Service are contained in Technical Publications - PUB 43802 and 54016 and Compatibility Bulletin 119 (see Technical Publication Information, Preface).

A Terrestrial 45 Mbps Local Channel Service is suitable for the transmission of voice, data (including ACCUNET[®] Spectrum of Digital Services) or any other application required by the Customer which utilizes digital signals within the specified transmission parameters of the local channel.

A Terrestrial 45 Mbps Local Channel Service may be furnished (1) between customer locations within the State of Arizona or (2) solely as an Access Coordination Function.

7.1.2 Regulations

In addition to the regulations in Section 2, preceding, the following apply.

A. Availability of Local Channel Service

Terrestrial 45 Mbps Local Channel Services are available from the designated AT&T central offices listed in AT&T's Business Service Guide. Terrestrial 45 Mbps Local Channel Services may not be available in every LATA.

B. Credit Allowances for Interruption

For purposes of determining credit allowances in accordance with the regulations in Section 2.7 preceding, a Terrestrial 45 Mbps Local Channel Service is considered to be interrupted when:

- there has been a loss of continuity, or
- 300 or more seconds of transmission containing errors occur in a 15-minute period on a DS3 level.

¹Effective December 1, 2013, customers may not establish new term plans of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis. SECTION 8 - GENERIC DIGITAL LOCAL CHANNEL SERVICES¹

(T)

8.1 General

A Generic Digital Local Channel Service provides for the transmission of digital signals at either 9.6 or 56 kbps.

8.1.1 Description

A Generic Digital Local Channel Service provides a digital channel for the two-way simultaneous transmission of signals at the rates of 9.6 kbps or 56 kbps in a framed DSO signal format. The transmission specification standards for Generic Digital Local Channel Service are contained in Technical Publications-PUB 62310 (see Technical Publication Information, Preface). ACC Business, a non-AT&T branded division, is introducing intrastate private line products. All terms and conditions, rates and charges are identical to the existing AT&T Generic Digital Local Channel Services in this tariff.

A Generic Digital Local Channel Service may be furnished (1) between customer locations within the State of Arizona or (2) solely as an Access Coordination Function. A Generic Digital Local Channel Service may not be used with DATAPHONE[®] Digital Service.

¹Effective December 1, 2013, customers may not establish new term plans of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis. SECTION 9

EFFECTIVE: DECEMBER 1, 2013

1ST REVISED PAGE 1

BY: CAROL PAULSEN-TARIFF ADMINISTRATOR

CANCELS ORIGINAL PAGE 1

SECTION 9 - DIGITAL DATA LOCAL CHANNEL SERVICES¹

(T)

9.1 General

A Digital Data Local Channel Service provides for the transmission of data at various speeds.

9.1.1 Description

A Digital Data Local Channel Service provides an all digital channel for the simultaneous two-way transmission of data at synchronous speeds of 9.6 kbps or 56 kbps on a two-point or multipoint basis. ACC Business, a non-AT&T branded division, is introducing intrastate private line products. All terms and conditions, rates and charges are identical to the existing AT&T Digital Data Local Channel Services offered in this tariff.

The transmission specification standards for Digital Data Local Channel Services are contained in Technical Publication-PUB 62310 and 62507 (see Technical Publication Information in Preface).

A Digital Data Local Channel Service furnished between a Customer's premises and an AT&T central office for connection to a ACCUNET[®] Spectrum of Digital Services provided under AT&T Business Services Guides requires Digital Data Access Multiplexing, as specified in 9.2.6 following.

In addition, Digital Data Local Channel Service is provided between customer locations within the State of Arizona, or solely as an access coordination function.

The Customer is responsible for providing Channel Service Unit Functionality at each local channel service termination on a Customer's premises (see Connection of Channel Service Unit Functionality, 9.1.2.C. following).

9.1.2 Regulations

In addition to the regulations in Section 2, preceding, the following apply.

A. Availability of a Local Channel Service

Digital Data Local Channel Services are available from the AT&T central offices in the AT&T Business Services Guides. Digital Data Local Channel Services may not be available to all serving wire center areas within a LATA.

¹Effective December 1, 2013, customers may not establish new term plans of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis. SECTION 10

EFFECTIVE: DECEMBER 1, 2013

1ST REVISED PAGE 1

BY: CAROL PAULSEN-TARIFF ADMINISTRATOR

CANCELS ORIGINAL PAGE 1

SECTION 10 - VOICE GRADE LOCAL CHANNEL SERVICES¹

(T)

10.1 General

A Voice Grade Local Channel Service provides for the transmission of analog signals within a frequency bandwidth of approximately 300 to 3000 Hz.

10.1.1 Description

A Voice Grade Local Channel Service is suitable for transmission in one direction only (one-way) or transmission in two directions (two-way), of voice, data, or any other application required by the Customer which utilizes analog signals within the specified transmission parameters of the local channel.

A Voice Grade Local Channel Service is provided (1) between customer locations within the State of Arizona, or (2) solely as an access coordination function(s).

At the Customer's request AT&T will provide service to multiple Customer premises within a LATA through the use of a bridge(s). However, if AT&T determines that it is unable to meet service design and technical performance criteria in the configuration requested, the Customer will be advised and given the opportunity to cancel or change the order. In such cases, no charge will apply for the cancellation or change in the Customer's order.

Examples of technical considerations are:

- generally data circuits will not perform satisfactorily with more than three inter-bridged circuit links in tandem.
- AT&T's ability to test and restore circuits is diminished when bridging occurs outside its central offices. This is particularly severe when bridges are connected in tandem outside its central offices.

When a multipoint local channel service is furnished, the local channel is billed in accordance with the configuration provided via bridged and Inter-bridged Channels as set forth in 10.2.2 and 10.2.3 following.

10.1.2 Regulations

In addition to the regulations in Section 2, preceding, the following apply.

¹Effective December 1, 2013, customers may not establish new term plans of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis. SECTION 13 - ADDITIONAL ADMINISTRATIVE AND OPERATIONAL FUNCTIONS¹

(T)

13.1 General

This section contains the rates and regulations for Additional Administrative and Operational Functions that may apply in connection with the installation, operation and maintenance of local channel service. These additional functions will be provided only when specifically ordered or requested by the Customer.

All of the Additional Administrative and Operational Functions are subject to the availability of personnel and equipment. In furnishing these functions, AT&T does not assume any additional responsibility for the through transmission of signals beyond that set forth in the following:

AT&T is responsible for engineering, operating and maintaining the private line services it provides. It is also responsible for the quality of transmission or signaling on private line services it provides.

13.1.1 Testing Functions

At the Customer's request, AT&T will review test results and participate with the Customer in design review, technical analysis or testing.

A. Review of Communications System Test Results SYSTEM TEST RESULTS

At the Customer's request AT&T will review the results of tests of a Customer-provided communications system which is connected to a local channel service. (The Customer must arrange for those results to be furnished to AT&T.) Where appropriate, AT&T will recommend additional tests to be performed on the Customer-provided communications system.

Review of test results will only be provided when the Customer agrees, in advance, to pay the charges for the review.

The rates for Review of Communications System Test Results are:

	USOC	MAXIMUM CHARGE
Per person, first half hour or fraction	NROT1	\$29.40
Per person, each additional half hour or fraction thereof	NROT2	\$17.85

(T)
