Re: Horizon Power Project
2014 Ten Year Plan E-00000D-13-0002

To Whom It May Concern:

Enclosed for filing are twenty-five (25) copies of Horizon Power, LLC's 2014 Ten Year Plan for the generation tie line ("gen tie line") related to the contemplated Horizon Power Project electric generation station.

Thank you in advance for your assistance in filing the attached document. Please let me know if you have any questions in that regard.

Sincerely,

Lawrence V. Robertson, Jr.

Re: Horizon Power Project
2014 Ten Year Plan

To Whom It May Concern:

The information set forth below by Horizon Power, LLC ("Horizon Power") is being submitted pursuant to those portions of A.R.S. § 40-360.02 which are applicable to the Horizon Power Project ("Horizon Project") as of this point in time. In that regard, the Horizon Project is a contemplated natural gas-fired 650 MW electric generation peaking facility currently planned for a site within southwestern Arizona in an unincorporated portion of Maricopa County. In addition to the aforementioned electric generation facility, the Horizon Project will include a 230 kV electric transmission line which will connect the aforesaid electric generation facility to a contemplated 69/230 kV substation to be constructed, owned and operated by Arizona Public Service Company ("APS"). It is currently anticipated that the aforementioned 230 kV "gen tie line" will be approximately ½ mile in length.

Against the above general project overview, Horizon Power submits the following information as its Ten Year Plan for 2014 for the aforesaid "gen tie line," with specific reference to those portions of A.R.S. § 40-360.02 (C) which are applicable to the information being submitted at this time. In addition, as appropriate, Horizon Power will indicate below when information applicable to other portions of the Horizon Project which are not a part of the "gen tie line's" 2014 Ten Year Plan will be submitted.

A.R.S. § 40-360.02 (A)

The information hereinabove and hereinbelow set forth is being submitted pursuant to this subsection.

A.R.S. § 40-360.02 (B)

The information required by this subsection will be submitted to the Commission no later than 90 days preceding the filing of an Application for a Certificate of Environmental Compatibility ("CEC") for the Horizon Project.

A.R.S. § 40-360.02 (C)(1)

As indicated above, the currently anticipated size of the Horizon Project "gen tie line" is 230 kV with an anticipated length of approximately ½ mile and a right-of-way requirement not to exceed 120 feet. The precise location or

alignment of the "gen tie line" has not as yet been determined. Once such a determination has been made, information as to such location or alignment will be submitted (i) as a supplement to this 2014 Ten Year Plan, (ii) as a part of Horizon Power's 2015 Ten Year Plan, and/or (iii) as part of Horizon Power's forthcoming filing with the Commission pursuant to A.R.S. § 40-360.02 (B).

A.R.S. § 40-360.02 (C)(2)

The purpose of the electric generation station which is a part of the Horizon Project is to provide peaking power to Arizona electric utilities and to the interstate electrical grid as the same exists within the state of Arizona. The purpose of the related "gen tie line" is to allow electric power generated by the Horizon Project electric generation station to be transmitted to the aforementioned 69/230 kV substation to be constructed, owned and operated by APS.

A.R.S. § 40-360.02 (C)(3)

The currently estimated in service date for the "gen tie line" is 2018.

A.R.S. § 40-360.02 (C)(4)

The information required by this subsection relates to the Horizon Project's electric generation station. As previously noted, in connection with the above response pursuant to A.R.S. § 40-360.02 (B), the information required by A.R.S. § 40-360.02 (C)(4) will be submitted no less than 90 days prior to Horizon Power filing an Application for a CEC for the Horizon Project with the Commission.

A.R.S. § 40-360.02 (C)(5)

The information required by this subsection relates to the Horizon Project's electric generation station. As previously noted, in connection with the above response pursuant to A.R.S. § 40-360.02 (B), the information required by A.R.S. § 40-360.02 (C)(5) will be submitted no less than 90 days prior to Horizon Power filing an Application for a CEC for the Horizon Project with the Commission.

A.R.S. § 40-360.02 (C)(6)

As previously noted, the type of fuel proposed to be used in the Horizon Project's electric generation station is natural gas.

A.R.S. § 40-360.02 (C)(7)

The information required by this subsection relates to the Horizon Project's electric generation station. As previously noted, in connection with the above response pursuant to A.R.S. § 40-360.02 (B), the information required by A.R.S. § 40-360.02 (C)(7) will be submitted no less than 90 days prior to Horizon Power filing an Application for a CEC for the Horizon Project with the Commission.

Docket Control, Arizona Corporation Commission

Page 3 of 3

As recognized by A.R.S. § 40-360.02 (E), planning information such as that submitted in this Ten Year Plan is "tentative information only" and is "subject to change at any time at the discretion of the person filing the" same. In that regard, and as previously noted, as plans for the Horizon Project become more finalized, Horizon Power will submit additional information to the Commission (i) as a supplement or supplements to this 2014 Ten Year Plan, (ii) as part of its 2015 Ten Year Plan and/or (iii) as part of its forthcoming filing with the Commission pursuant to A.R.S. § 40-360.02 (B).

Thank you for your assistance in docketing Horizon Power's 2014 Ten Year Plan for the aforesaid "gen tie line."

Sincerely,

Horizon Power, LLC
