Re: Docket # E-00000C-11 -0328 .

DOCKETED BY

Dear Commissioners,

I am sending thanks to Tammy McLeod, Vice President & Chief Customer Officer (APS), on behalf of Mr. Brandt, for responding to the letter I sent to the Arizona Corporation Commission (ACC) November 8, 2013. Ms. McLeod confirmed that I opted out of the atrocious "smart" meter debacle on August 31, 2011. Further stating in the letter of her company's (APS) filing a proposal to the (ACC) for: "protectionism," complete with an extortion fee schedule for those standing up against the FORCED scamming of the People. How sweet! Sweet indeed-never thought I'd live to witness such blatant, bold faced, backward, underhandedness from those who should, and DO know better.

We are all in this together, like it or not; we all sleep on the same planet together every night. Nothing philosophical, nor political about keeping this planet inhabitable. A do or die stewardship. And yes.... It is not easy.... It never is. This is understood. Now to face the music of the moment in a way that makes the most sense.

Comprehending what's before all of us here, is no small task, but addressing it head on & honestly is a must. A focus on the real facts (not ill-conceived agendas with spin) is squarely what needs to take place. Stopping any & all actions not thoroughly (and properly) graced by peer reviewed INDEPENDENT RESEARCH The liabilities of which, for not stopping such actions after being thoroughly inform, are incalculably staggering. This ruinous behavior now being allowed is bringing serious damage in its wake everywhere it is employed. Even a half-

## UTILITY COMPLAINT FORM

---

baked study of the documentation on the above (ACC) docket will raise the hair on the back of your neck. No one will escape the egregious & devastating effects of this ill-conceived "smart" meter/"smart" grid fiasco. Yes, not even you!

Am I overstating the plight of these man made assaults against the People- I .do not believe so. Ms. McLeod, have you and Mr. Brandt, as well as (ACC) Commissioners, given due diligence to this well documented wealth of information [(ACC) Docket# E-00000C-11-0328]? This being your responsibility, is it not? In your letter to me Ms. McLeod you said nothing to address any of the many heinous trespasses against the People. Have you no sense regarding your own well being - and that of your loved ones? Or the stability and well being of the People as a whole? This ill-conceived illegal forced installation, covered up and lied about, is a great wrongful aggression against the People. Every point in what (APS) [REF#1208056] mails to customers can be easily refuted (An absolute einbarrassment to any properly informed person). Is this not fraudulent lying? Spending ratepayers money disseminating (false/NOT true) information, along with other twisted advertising propaganda. Intimidating customers with possible extortion fees for something they neither want, need, nor benefit from. Strange & sickening things going on here; right under the nose of the (ACC).

Monopolized Utilities are allowed the easy access to gigantic profits to curb unruly competition (keeping the peace) but then to be regulated by each State's appropriate Board for such. Is not this long standing guaranteed wind-fall profitability good enough? Ah, but for the larger agenda push by higher ups not unlike the Federal Government & others. Like myself, you may be feeling the need for Self defense, eh? [Bad news for us all] This whole thing is looking worse day by day. What do you really sense, feel, or even know about, regarding all of this. Neither Government agencies nor Utilities make decisions - people do! It's past the time to stop all this nonsense - time to name names & blow the whistle loud, long & strong. Secure yourself in an appropriate life boat - least you go down with this sinking ship of malice! Make your stand one for honesty -reaping the benefits of a clear conscience.

Below is a quick overview of what needs our undivided attention:

**VERY UNHEALTHY!** Completely out dated and irrelevant regulation standards, as well as, heavily biased & manipulated data is how you conclude "smart" meters to be safe. On the contrary, there is overwhelming evidence that they are NOT safe.

**PRIVACY INFRINGEMENT!** In NO way can these devices possibly comply with the 4th Amendment of the U.S. Constitution or State and Federal wiretap laws.

**PROPERTY INFRINGEMENT!** Utilities are taking private property on which to build their own communications and energy management network.

**NOT SAFE!** Additional stresses on the wiring of buildings poses even more serious questions as to safety. Fires and appliance damage has been reported.

**NOT COST EFFECTIVE!** There is NO financial benefit to the ratepayer, as evidenced in investigations done by the Attorneys General of the States of Connecticut, Illinois, & Michigan, as well as a cost/benefit analysis done by Ernst & Young for Germany.

The lies allowed to be disseminated regarding this OUTRAGEOUS debacle are despicable, tearing at the very fabric of this Nation & its People. How on earth did you think these crimes against the People would go unnoticed? This must be stopped immediately!!! Let's work together & get this turned around - before it gets more ugly than it is now.

Respectfully,

Stan Kingman
