## Ban Smart Meters in Sedona Arizona

Petition published by Sedona Smart Meter Awareness on Feb 11, 2014

### Background (Preamble):

APS is going to begin installing Smart Meters in Sedona, AZ and surrounding areas in early March. Residents have expressed concern about health, safety, privacy and rate issues and most do not want Smart Meters installed.

Last fall, the Board of the American Academy of Environmental Medicine issued a statement that "...peer reviewed, scientific literature demonstrates the correlation between EMF/RF exposure and neurological, cardiac and pulmonary disease as well as reproductive disorders, immune dysfunction, cancer and other health conditions. The evidence is irrefutable." The Board called for a moratorium on smart meter installations.

Residents of Sedona need to opt-out individually but also seek the support of the City Council, the Arizona Corporation Commission and APS to honor their request that Sedona be kept Smart Meter free and without penalty fees. NOTE: the Arizona Corporation Commission has not yet approved any fees for opting out. When you call to opt-out, be sure to ask to retain your analog (mechanical) meter.

### Petition Text:

We, the undersigned, in the interest of public health, safety and welfare, petition the Sedona City Council to take whatever steps are necessary to ban Smart Meters from all properties, commercial and residential, within the city limits and to disallow the collection of any fee in association with this ban. We pledge to call APS and opt out individually to support this effort.

My husband Gary and I totally oppose the installation of Smart Meters in Sedona and in our home. We have a right to protect our health and a duty to protect the health of others and the environment which we all share. Smart Meters put all of us at risk!

**1550 Stephanie Garcia**

Please do not force us to have "smart meters." We have enough frequencies in the airwaves.

**1541 jocelyn buckner**

I am appalled that the mayor and council members did not stand up for the health and welfare of Sedona. Smart meters have been proven to be harmful and APS has been caught lying. I do not want a smart meter any where near me, my children, or my pets. They are a very bad idea.

**1540 Julie Rist**

APS - or any other utility - does NOT have my permission to damage my health and that of those around me. There are more than enough studies already to support an immediate ban on these weaponized EMF delivery systems.

We should not have these installed anywhere. They should all be taken off and dismantled.

I entered an affidavit and peer reviewed studies into the state docket. My affidavit was NOT rebutted, it obviously cannot be rebutted. We are not your guinea pigs. People in the Verde Valley are not having adverse reactions to the smart meters and abandoning their homes. There is no adequate remedy at law for exposing us to smart meters, rats exposed to wifi for 7 generations became infertile. Knowing this one can only assume there is a conspiracy to cause sterility, who are you working for? As state employees you can be charged with felonies for not doing your job and upholding your oaths of office.

The digital meter, which comes before the "smart" meter, caused many physical symptoms in my household. As soon as APS changed it back to a non-transmitting analog meter, our physical symptoms subsided. I can't imagine what a smart meter would be like to be next to the house!!! Heart palpitations,pain, extremely high blood pressure were the "minor" symptoms.

**1425 Adrienne Almamour**

I became horribly sick from the digital meters - BAN all automated meters!

We opted out with APS and even have a confirmation letter, but after we had solar energy installed APS went ahead and put up a "dirty" digital meter, which I understand just needs a small modification to be a full-blown Smart Meter. We have health issues in our family and don't need things made worse by these awful 'high tech' meters.

This month, my analog meter was replaced & switched with a 'smart' meter without my consent by APS, the electric utility company. Yes, I had a paper put on my door saying they would install them in three days, but NO- THEY DID NOT GET MY CONSENT!!! As I was out of town for the time being, Monday I will be calling APS to demand they switch my meter back to the analog meter. They have no proof that smart meters have no affect on our or the environment's health, in fact, if the ACC asked the AZ Department of Health to conduct a study of the radio frequency health effects of smart meters, why is it that that they are continuing to allow the installation of these meters before the study has been examined? We have the right to opt out of these smart meters! They have to prove to me that there is beyond a shadow of doubt that there are no harmful effects from them before I am going to allow them to be attached to the home I live in!

Hey, if APS doesn't want to send somebody out to read my meter, I can email a pic of the meter readout on whatever day APS specifies. That way APS can save money and time by having customers email a photo of the readout. APS can also save money by not having to install smart meters. This is 2014, everybody has a phone and an email address. If APS chooses to charge me for opting out of smart meters, I will take the case to court and present the solution of emailing a photo of the meter readout. We will see who wins then.

Smart meters no doubt provide financial benefits to utilities and investors, or there wouldn't be such a rush to install them. However, they offer few if any financial benefits to senior citizens and low-income consumers who would be financially coerced into having the meters installed. In fact, these consumers would be unfairly penalized by the proposed opt-out fees, which many people simply can't afford. Why should we passively and/or ignorantly submit to the rush to install smart meters? Let's first pay attention to the existing scientific evidence\* of health hazards created by smart meters, before we let utilities trample all over our freedoms and rights. As consumers in the United States of America, most of us value our right to choose; unfortunately, when it comes to smart meters, we are limited in our choice of electric utilities.

\*If and when healthcare costs increase after the installation of smart meters, who would reimburse consumers for these costs? My understanding is that electric utilities would be immune from such lawsuits. Please, people: THINK ABOUT THIS!

There is a plethora of data on electromagnetic frequencies and how it adversely affects, not only humans, but all life. The frequencies are not "out there" somewhere; they run through us, creating problems that will surely continue to challenge us into the future, if we do nothing to stop or reverse it now! Are we not already over-saturated with electromagnetic frequencies and more? How much proof do we need?

From the many people I've spoken with, to the meeting at City Hall, it's clear that the people of this community are well-informed, justifiably concerned, and don't want to have this thwarted upon them. We don't need more studies, especially studies supplied to us by the very corporations that we're questioning. We need people (especially those who are in positions of power), to listen and take action, to make sure our best interests supersede those of the corporations.

I moved to Sedona to escape the misnamed smart meters & other toxic pollution. What an insult APS foists on us. Is this a strategy to eliminate much needed jobs, replacing people with machines? E Recovering here in Sedona from the emf ridden atmosphere in San Diego it feels like an attack on our nervous This is no small thing for seniors or growing children.

I do not look forward to having to move again as a result of this laming smart meter tech.

Delay and research. DO NOT believe unless you, yourself, research this issue.

We already deal with dumped airplane fuels for take off out of here. We have had planes spraying our skies full of chemicals for a month! E-Coli at Slide Rock and bags of blue garbage along the road every Monday. We must stop polluting our own environment folks! Let's start right here in Sedona.

Several bonafide studies have now been done that provide compelling evidence that smart meters should not be installed in their current state of development. Imposing these meters on any population is unacceptable. These meters are capable of monitoring every word spoken in our homes and businesses. They are in effect very sophisticated bugging devices which clearly violate our 4th Amendment Rights. If neccessary we should form a class action suit against APS and the Arizona Corporate Commission for their continued abuses of both State and Federal laws. Please sign this Petition before they impose these meters on all of us.

In my perception, no mason, machinist, or otherwise should be allowed to view;listen to anyone in his/her private domain without authorized consent from at least one adult and one child in the household who has a legitimate complaint about physical non-sexual abuse. In regards to sexual abuse of a minor, a parent/loved one/ adult resident and a minor should

be able to make a complaint that merits monitoring for a specified duration- In regards to a minor, who doesn't have support of an adult who has complaints of sexual/physical abuse , these can be addressed swiftly and rapidly with the agreement of 2-3 disciplines including a teacher/principal, law enforcement officer, and/or child/social welfare worker who can meet and discuss a case that meets specific criteria that merits monitoring of a home. In my perception, authorized consent should be valid only for a limited duration if nothing has been proven by a specified/allocated time not exceeding 1 month, with specific criteria for rapid renewal. Issues of concern I am referring to are physical abuse towards anyone in the family who has sustained a proven injury; as well as sexual abuse of any kind to a child under 18.

Quite a few people we have spoken with including my son who reside in Texas have complained their total monthly billings have gone up drastically. My son in Plano now uses ceiling fans as their electrical bill when using AC is almost triple. There are NO long term safety studies proving the safety of these meters for the various side effects that have been measured and reported. My wife and I are bringing a new life onto this planet due in April. I will not condone exposing my new child to a technology APS can not prove is safe. I have reviewed much information about the smart meters and I believe that they could be a danger to our health. I submitted an 8 page affidavit and peer reviewed studies proving smart meters are genocidal, cause DNA damage and there is no adequate remedy at law or relief, therefore installation must be halted; my affidavit and the incorporated peer reviewed studies were not rebutted. My affidavit and the peer reviewed studies stand as fact. All of the Arizona Corporation Commissioners are guilty and personally liable for damages, they are all in violation of their oath of office and their public bonds needs to be charged against and they need to be removed from office. All APS and the ACC need to do is rebut the studies I submitted but they cannot, so they tried to pass the buck to the State Health Department to absolve themselves of guilt.

Smart meters are dangerous for one's health, invade people's privacy, and can cause spontaneous fires. These toxic meters should not be allowed within any city's limits and especially not in Sedona. I absolutely do not want any smart meters installed in Sedona and all smart meters that have already been installed should be removed and exchanged for an analog meter. As someone who has worked in the sustainability and technology industries for many years, I have learned a lot about smart meters first-hand and know that these smart meters do not do what they are supposed to. Any meter that poses such a danger to people's lives should not be considered "smart" and should certainly not be placed in the vicinity of people's homes and schools. I urge the Sedona City Council, APS, and the ACC to do everything in their power to support Sedona citizens in preventing more potential tragedies from occurring from installing smart meters. Thank you for helping to ensure the safety and welfare of your citizens by banning smart meters in Sedona.

Smart meters have not been around long enough and have not been tested on humans for longer than 90 days. Tests performed have been on working people who are not home a lot. Smart meters are made in China and have caused house fires. Smart meters spy on people and track their behavior. SMART meters should be outlawed , as well as digital meters. Analog meters work. I have researched all kinds of essays and studies and personal accounts of the dangers of smart meters. I don't want one any where near my home, me, my family or my animals. They are dangerous and we are already inundated with radiation in our environment. I also hate to see all those people who are meter readers lose their jobs! NO SMART METERS IN SEDONA! I don't know a single person, not a single person, in my community that wants smart meters here. And I know A LOT of people as I have been here for 15 years, have owned two businesses, helped create a school, have produced and facilitated several fund raisers and I LOVE THE PEOPLE and this beautiful place. I want to keep it sacred and as unscathed by this kind of dangerous technology as possible. This is an educated choice, not one of hearsay or conspiracy theory like so many people here. I know the dangers and am forever disappointed in the corporate heads who are already making ridiculous money charging the masses for something that should be provided for free to the public along with water, sewer, medical care and education.

**519 Scott Beck**

[Back to signature list](#)

The installation of the 'smart meters' is an attempt by APS to bully the public, and the idea of making us pay a fee not to have it installed and then a monthly charge on top of that is extortion by a company that has a monopoly on the electrical grid.

**515 Alan Painter**

[Back to signature list](#)

There is abundant documentation showing that the dangers of SMART METERS far outweigh any alleged benefits. It is quite clear that any government agency intending to install SMART METERS is acting against the people of Arizona. Those of us studying the cabal and their "New World Order" are entirely clear as to the reasons for SMART METER installation: to reduce the population to manageable (for the power-that-be) proportions and to control the rest. Thank you for considering banning the Smart Meters in Sedona. After all of the scientifically proven data that has surfaced relaying the negative health risks caused by Smart Meters, I know the City of Sedona will stand behind the residents and support not installing them. Smart meters are a national security threat. If the power grid system becomes computerized, as it will with smart meters, then the power grid is subject to hacking. This is a fact. Sedona, Corporation Commission and APS must GUARANTEE to the public the smart meter is safe in every way. Why would the Corporation Commission allow a device that would subject our town and nation to terrorist threat? There is no debating this issue.

**450 Leigh Shafer**

[Back to signature list](#)

There are too many people in this area already suffering respiratory problems - exposure to the dangers of "smart meters" will increase the risk and shorten our lives. Further, these meters will not cut our costs of electricity - all they will do is increase profits for APS and allow APS and government agencies access to our homes and private lives. It's time to say NO to this.

**449 Michael Hanaford**

[Back to signature list](#)

I don not want a smart meter. Period.

**448 Katherine Huffstetler**

[Back to signature list](#)

I believe that the installation of Smart Meters should be delayed until there has been a thorough review of all the research, particularly the health effects of electromagnetic radiation. Studies have shown that EMF changes your blood chemistry and DNA and weakens the blood brain barrier. We can't take chances with our health. Once it's gone it is hard if not impossible to recover it.

I believe that commercial buildings should be allowed to opt out without penalty.

Employees and volunteers should not have to accept questionable working conditions. As we go from the gym to the grocery and the bank, then to lunch or dinner at a restaurant we are accumulating exposure to EMFs. It is cumulative, and it's all involuntary.

People with pacemakers will have a hard time with this. Some potential residents/tenants/tourists have made it known that they prefer to go to or reside in places without Smart Meters.

I've been heavily involved in the green movement for about a decade, including publishing one of the premier national green magazines in this country and the ignorance in this movement, the lack of critical thinking skills and the prominence of authoritarianism...thinking some phony official authority knows better than common sense or the will and insight of the people is so bad I've had to step back and process the depth of this existential crisis within myself. This issue of smart meters is a prime example of authoritarian stupidity trying to fool the average person and their common sense research from interpreting the simple truth that it is deadly, destructive, and will destroy the lives of millions of people if collectivists who lack critical thinking skills just sit back and endorse this ignorance. Please quit being a sheep and relearn to think for yourself once again. This country was built on rugged individualism and self reliance. Collectivism and authoritarianism is what always made other great nations like Germany Russia and China inferior to us and is why we still have some freedom left. Remember who you are and think for yourself. Please. Your life depends on

I will not tolerate any malevolent presence stepping into my space, robbing me of my basic rights and freedoms, monitoring my every movement, and poisoning my sacred home and body. It's enough that we are being sprayed with a toxic cocktail from above, and are being bombarded by lethal frequencies every single day. This, and other atrocities of this kind of widespread destruction (greed based technology suppression, weather manipulation, monetary fabrication, mass poisoning of food and water, and MANY others), are actions worthy of war crime consequences surpassing those faced by the Nazis, and all of the worst tyrants throughout history. I pray every day that either the whole system crumbles, or that people can finally be moved to unifying action, taking back our power from the filth and sickness that our so called government has become, exactly as we are morally and legally obligated to do, completely under the protection of the documents that built the very foundation of this country, whatever the means. I sleep well at night knowing that this perverted and utterly satanic organization of fools and murderers will some day be brought to justice. God bless and restore America.

I did my own research on 'smart meters' and found not one benefit for the people. When truth was revealed - not one benefit could be found! When connecting all the dots through the trail of misdirection - all leads back to the larger 'somewhat hidden' agenda ... We, the Community of Sedona, can not be a City of Peace and be in INTEGRITY if we do not do ALL we can to halt the installation momentum and prevent the intrusion of this equipment and its network in our community environment. Yes - there are indeed also huge health concerns and security concerns documented in hundreds of ways as irrefutable evidence for anyone who dares to look beyond the myths of the Utility company's PR campaigns. For the Good of ALL the People - We must ACT NOW in ALL the ways we can - in my humble opinion. Please - let us follow the lead that was successful in another location (Fairfax, CA) and simply get this done in the most expeditious way. Everything to gain--so why not? I find no valid reason. Our proactive choice can serve to open all for greater transparency that is being called forth now. We with eyes to see & ears to hear know it is time to take a stand - Lets get this done.

I have been openly advocating a ban on Smart Meters in Sedona for over two years. I have opted out and have the blue tag on my meter. I urge others to call APS and do the same. Smart Meters cause fires. We are surrounded by National Forest. They are also dangerous to our health. While walking on Schnebley Hill Road, I met some tourists from Australia who said that Smart Meters were the worst thing to happen to them in Australia. Not only have the meters proven to be dangerous to their health, their electric bills went up shortly after their Smart Meters were installed! Our City has been shamefully remiss in protecting us from the dangers of these meters by ignoring our own City Ordinances and rolling over for big business. Shame on our City Attorney, and City Council for not representing us properly and standing up for our individual rights. I urge them to do so now. It's not too late.

APS is displaying greedy bullying behavior based on the fact that they're a monopoly in AZ. ACC is ignoring residents' rights to refuse to knuckle under by allowing APS to charge an opt-out fee for something we don't want. Is ACC in the hip pocket of APS? Why don't they listen to us and read the health hazards of the 'smart meters'? We ask ACC to do the right thing for AZ residents, and not cave in to the greed of APS. You have a duty to the public, not to a corporate monopoly who only has its self-interests to serve. APS is targeting those customers who are standing up to them and telling them we DO NOT want to participate in their greedy overbearing scheme, nor do we want to be charged \$70 initial opt-out fee and \$30/month thereafter simply because we opted out. Come on, ACC, show us you care for the citizens of Arizona, rather than colluding with the corporate monopoly known as APS.

**121 Guy Turck**

[Back to signature list](#)

Our family has already opted out.

When i heard about this I called APS and this is what they had to say...

While agreeing not install a smart meter they did point out that APS has a proposal before ACC that would allow them to charge a monthly fee to those choosing to opt out. I asked, if the fee were to be approved, whether I would be given the opportunity to change my mind about the smart meter & they said yes, it would. And at no cost to me.

However,

APS asked why I was opting out & I cited health and privacy concerns. I asked if APS would be selling the data collected to 3rd parties and was told no, they would not. I then asked what assurances I had that the policy would not change in the future (ala Facebook and others) and was told any policy change has to be approved by ACC.

I then asked a hypothetical whereby, having opted-in to avoid a potential monthly fee, I decided to opt out in order to avoid the invasion of privacy & sale of my data that might ensue were the privacy policy to change. I was told that were I to opt out at that point I would have to pay to have the smart meter removed AND pay the monthly fee.

This is a scam to collect data. Please don't be fooled.

[Back to signature list](#)

We have lived with smart meters in California for 4 years now. I have been part of a group measuring smart meters in the area I lived in. Even though we were assured the SMs communicated with the utility "several times a day", we found peak values (spikes of radiation) in excess of the FCC standard coming 3 - 10 second apart. The "mesh system" means even if you opt-out, your neighbor's SM will beam through the front part of your home, and the next, and the next. You need to try very hard to opt-out as entire neighborhoods, or ideally as a whole community. RF (microwave) radiation penetrates every living cell -- plant, animal and human. It changes the way our brains react, it threatens the health of our cells, and it is a possible human carcinogen. Do not let Sedona be permanently altered by this radiation. I have watched profound changes take place in my neighbors -- their health and their behavior. Learn from CA and act now.

This is a serious issue! Back in 2011, when I was diagnosed with cancer, and doctors could not understand how it formed and grew so quickly, I did research about everything; diet, EMF radiation, the list goes on. I realized one day that I had a digital meter on my home, RIGHT where I slept every single night. I was always run down, and my children had started showing signs of decreased immune system strength, suddenly also. Severe digestive issues for my youngest son. When we removed the meter from the house (APS was NOT happy about it, but I insisted and would not give up or give in) and replaced it with an analog, we all immediately began to show improvements. These meters are seriously damaging to health, and they NEED to be removed from the places they already are in Sedona, and need to STAY OUT. I am not willing to allow myself or my children or community to be poisoned by these dangerous devices! Thank You!

It is our right to protect our health and well being. There is evidence that smart meters pose a health risk and have been plagued with numerous safety issues. I am very sensitive to electromagnetic pollution. It is in the interest of our community to ban smart meters. Please take a strong stance with APS in this matter.

Because APS is attempting to force these smart meters on Jerome Residence as well, I support those in Sedona who are being forced to accept these un safe meters with out any discussion or review on the health and safety, but purely as a means to create profit, it is time those elected individuals stand on the side of communities that wish to remain safe and have the choice as to what they wish to bring into their homes and communities.

While I serve on City Council, I sign this petition as an expression of my own opinion. I am not speaking for city council or staff. After over 2 years of reviewing research, I have not seen any evidence that these meters are a safe technology. This situation reminds me of the effects of smoking, DDT, Agent Orange, lead, asbestos, thalidomide -- everyone thought these things were safe and the govt was protecting us with their regulations. Not until there were many deaths did the truth come out - and usually the industry knew of the dangers of their product but did not let the public know. There does not seem to be ANY benefit to the consumer with these meters. Only the utility benefits. Studies say 3-5% of people are EMF/RF sensitive. In Sedona that would be 300-500 people. Why would we allow something that could hurt 300-500 of our neighbors? Let's all opt out and require that APS and ACC honor our request without penalties.

I have already demanded that APS is unauthorized to switch me to a smart meter. You can do the same!

It's time for the City Council to step up to the plate and exercise its legal right to protect the health of the City's residents. This right should supercede any supposed authority by the Arizona Corporation Commission to regulate utilities in the State when such decisions do not take into consideration adverse health effects on City residents, which is a growing body of evidence shows is clearly the case with so-called smart meters.

The community is clearly and with one voice opposed to the installation of these devices. You can expect a long and drawn out battle should you choose to go ahead with installation.

smartmeters flipped a switch inside of me the minute they were deployed here.i am now EHS and MCS and have endured the torture of witnessing hundreds of species of life suffer and die because of this project that blankets entire municipalities ,rural and urban alike,with a microwave spectrum mesh network.no words can describe the endless suffering i have both witnessed and endured,the smartmeters were the begining,setting up the infastructure necessary for the wimax project adding absolutely dangerous towers on close to every block .now they are doing road work projects with intelligent streetlights also connected to this "smart" grid.the bats fell from the sky first here,frogs disappeared next,trees suffering a slow death,otter/beaver,nesting ducks,bumble bees,all gone here now.please dont fall for the fraudulent representation for this deadly program.no benefits whatsoever have come from this program.quit the opposite has occured and no remedy can be found once they are allowed to begin this deployment.please research the harm being caused in every single place this smartgrid has been deployed.billions of dollars down the drain for a project that causes nothing but harm

due to health and safety concerns, I do not want any smart meter installed in my home or neighborhood.
