Nature of Complaint:

Docket No. L-00000F-09-0190-00144

Caller is in opposition to the approval for a power line installation in Santa Cruz County. He feels a better route could and should have been made. He has a petition signed by those adversely effected by the choice of route. He feels no action was taken about the lack of concern for public safety. Those signing plan on suing the company if catastrophic failure occurs. The lines should be on the west side, where none would have been effected. Some have lines 5 ft. from a seimming pool, and others directly over their home. Committee did not follow the methodology about where poles would be placed. He is a professional environmental specialist who has worked in the industry. They are concerned about the number of microbursts that occur in the area and the possible damage to property and people should one of these towers fall.
