Re: Arizona Corporation Commission Docket No. RE-00000C-14-0112  
Proposed Rulemaking to Modify the Renewable Energy Standard Rules  
in Accordance with Commission Decision No. 74365

Dear Jennifer:

For your information, I have enclosed a copy of Commission ("Commission") Decision No. 74365 and a copy of the Utilities Division Staff's ("Staff") Notice of Compliance Filing per Decision No. 74365. The Notice sets forth seven (7) options to modify the Renewable Energy Standard Tariff ("REST") rules consistent with the Commission's directives in Decision No. 74365. Please feel free to review these various options and if you would like, provide Staff with your thoughts and/or opinions along with any suggested modifications you may have.

In addition, Staff would appreciate any information you may want to share on other states and actions they have taken to address the issue of using Renewable Energy Credits ("REC"); in particular, how the Center for Resource Solutions views the method by which the State of Texas has dealt with the REC issue.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven M. Olea".

Steven M. Olea  
Utilities Division Director
